Comments, Fellstrail (DCR) [Fellstrail.Comments@state.ma.us]

Hello,

I'm writing because I'm concerned about the Department of Conservation and Recreation's actions relating to Middlesex Fells. Many residents have put time and effort into voicing their opinions to reach an agreement that would satisfy hikers, bikers, and dog owners. All of their needs should be taken into account in deciding on a plan for Middlesex Fells and the Department should not keep delaying action. Dog owners have few nearby locations like Middlesex Fells where they can bring their dogs to exercise. Dog owners who live in apartments or who don't have yards rely on bringing their dogs there to exercise, and can enjoy it even more so if their dogs are allowed to run and exercise off leash. Middlesex Fells is a great amenity for all those in the community, and everyone should be allowed to enjoy it equally. Hikers and bikers already have areas of the trail they can enjoy for themselves. Dogs and their owners should also have an area to enjoy too.

Please consider this and move forward the trail plan for Middlesex Fells.

Thank you,

Maura Pillsbury

Subject: Re: The Middlesex Fells Trails Plan public meeting

Dear Commissioner Sullivan:

Congratulations on such a well-run meeting and professional preparation by your staff. I am still reading through the content of the trail plan but the research, preparation, and presentation we saw last night was all very thorough. I'm very glad we've gotten to this step and am looking forward to working with the DCR through the remainder of the implementation and the RMP process.

Thank you and best regards,

Chris Thurrott

Subject: Feedback on Middlesex Fells

Middlesex Fells are an oasis of natural beauty and sanity. I was grateful to discover them when I moved to Boston because they were close and accessible by public transportation or by bike. I have occasionally met local people who treat them as a sort of sanctuary where they don't want human presence. I would love to be able to get close to the water, respecting that it's a reservoir, but I hope you are able to find a way to maximize the benefits for all concerned. I prefer to walk and bike in the Fells. Best of luck with the process.

Subject: comments on middlesex fells

I don't mind if dogs are off-leash as long as they will come when the owner calls them (Am not a dog owner but love to see them in the park)

Would be nice to keep bikes off the rock circuit and the skyline - a lot of it is not suitable for bikes anyway.

please, please, keep any motorized vehicles out. And would be nice to have a number to call to report such things (have only seen it twice but better to be prepared)

There used to be a notice up - that bikes were NOT permitted from like November to April- but it never said why - and I always wondered - people are more apt to do things when a good reason is given I would think.

Is there any way the police can do "stings" and try and catch the people who smash the windshields ? mine was smashed once - and just the other day, I saw the tell tale glass next to the virgina wood parking area - meaning someone else had been hit. A safe place to park is key.

Fells SiteWalks Notice (2).docx (22 KB)[Open as Web Page]

I've read the draft and I think it is a good start for equitable use for mountain biking. My only comment at this time is that making Virginia Woods open only to pedestrians puts mountain bikers traveling from the south east sections to the north east sections into traffic, on the wrong side of Woodland Road (no sidewalks) or cuts them off from accessing Whip Hill, etc trails. We need a trail or dirt road through the V.W. section. One that goes around the "bottom" or "top" would suffice. Otherwise bikers will ignore signs and ride through the middle of V.W. as they do now.

I do hope that dog walkers can obtain some legal off-leash access as well.

Subject: Middlesex Fells Reservation Trail Plan

I just read your proposed trail plan for the Middlesex Fells and wish to make a few short comments about it:

- 1) I am very encouraged that you have produced this plan, I think overall it is excellent and look forward to the implementation of it.
- 2) I strongly support your proposal to improve the amount of single track available to mountain bikers by making other trails multi-use.
- 3) I strongly support your proposal to allow off leash dogs at sheep fold.
- 4) Simplifying the trail network by closing off a lot of the dead end trails, or 'spider network' trails will make navigating the trail network a lot easier.
- 5) Good maps provided by the DCR will be a significant improvement. The maps you posted showing the trail system on the trail plan section of the web site are excellent and far better than any of the maps I was able to find on the DCR web site up till this point:

<http://www.mass.gov/dcr/news/publicmeetings/materials/greenwaystrails/mapEmidfells.pdf>

6) When creating maps and improving signage I have found the system used at Lynn Woods where each trail intersection is numbered so if you need to find where you are you just look for the same number on the map to be excellent. Introducing a similar system in the Fells would significantly help navigation.

7) About parking, at the Marjam entrance to the Fells could the signage be improved to clearly indicate where parking is allowed as I understand that Marjam owns the parking area where I see quite a few Fells users commonly parking, sometimes Marjam has these cars removed, and I think the people in question simply do not know they should not be parking here.

8) I liked your diplomatic handling of FOF vs NEMBA issue. I am a strong mountain biking advocate but that does not mean I do not also love walking in the Fells and want to protect it for my children. I really hope that FOF will accept these changes and allow us (NEMBA) to work with them to improve the Fells for everyone. I am encouraged by your leadership on this trail plan, and am hopeful that with this continued leadership you will get all stakeholders working for the greater good.

I am an active Fells users who is often found hiking with my kids, walking my dog, riding my bike in the Fells. I moved to Melrose specifically because it was close to the Fells. It is a fantastic natural resource.

Please keep up this excellent work, it is great to see that the DCR is actively working to improve the Fells and I wish you the best of luck.

Subject: Well done.

Folks,

The draft plan looks great. As a hiker, dog walker and mountain biker in the Fells, I'm happy to see a plan that should improve the condition of the Fells for all of its users.

Involving users in protection of the Fells environment seems essential. While I am not a member of any of the involved groups (e.g. NEMBA, Friends, etc.), I hope DCR plans to

create opportunities for people like me to be involved in making the Fells a more enjoyable place for all of us.

Regards,

Paul Novosad

Subject: Regulate bike usage in Fells

Hello,

I am a hiker and enjoy hiking in the Fells regularly. As a matter of fact, we recently moved to Woburn, in part because it is near the Fells.

Biking

I have been reading about the issue of mountain bike vs pedestrian use of trails in the Fells.

Recently when hiking, I saw a number of bikers. They were all polite. However, some were not on the trail designated for biking.

There can be no arguing with the fact that bicycles tear up terrain more than a walking human.

Therefore, it makes sense to me that mountain bike usage continue to be limited to a designated trail and that there be monitoring of this usage, with some kind of fine for scofflaws, to discourage disregard for the rules.

Ultimately, this will benefit all, as the hiking trails will need less maintenance and bicycle user groups can focus on helping with the maintenance of the biking trail.

Dogs

I support an off-leash area for dogs - the Sheepfold or elsewhere. Again, the leash law elsewhere should be monitored, as possible, with a fine to discourage ignoring the rule.

Thanks for listening,

Gail Page

Subject: Fells Trails Plan

Dear DCR,

First let me say thank you for all the work you've done and clear concerns shown for fixing several issues with the Fells trail system. As an avid mountain biker, I consider it a privilege to ride my bike on trails in a beautiful place so close to urban Boston. I attended the public meeting on Monday, September 20th, 2010 regarding the development of a new Resource Management Plan for the Fells. It is clear that there are several user groups who are passionate about the Fells and their choice of recreation.

After reviewing the draft trail plan, I believe there is a clear bias towards hiking/hikers in comparison to mountain bikers. The draft trail plan comments several times on "biking on hiking only trails" but never is there a mention of "hiking on biking only trails". And obviously this is because there are no "biking only" trails. Section 3 (page 26-27) of the draft trail plan describes (quite well) the mountain bikers experience and desires for types of trails and terrain when mountain biking. I'd like to draw specific attention to the comments about the importance of singletrack and loop trails and yet there are only two miles of singletrack track trails open to bikers in the Fells. Thus, it should come as no surprise that mountain bikers are riding on "hiking only" trails because these are the singletrack trails identified by the DCR as important to mountain bikers. In keeping with their bias towards hikers, the DCR could only expect more user conflicts if biking was allowed on current "hiking only" trails so I don't expect completely equal treatment in that regard. The solution then is simple, provide mountain bikers with their own singletrack trails that are designated for biking. These trails do not have to be "biking only" but rather have proper signage indicating the trail is designated for mountain biking trail and all other users be aware and perhaps yield to riders. Simply put, you cannot expect mountain bikers to stay off their beloved singletrack, so provide them with their own and the user conflicts will reduce.

I do not speak for NEMBA but as a member I believe they are an excellent resource for understanding the types of trails that would be sustainable and fun and could be used for the designated biking trails. Also, the DCR will likely have a small army of trail builders and trail maintenance workers through NEMBA for sustaining these trails at no cost to the DCR. Mountain bikers want fun, flowing singletrack trails where they can ride with little worry of disruptions from other users just like other users don't want disruptions from bikers. Providing singletrack trails designated as mountain biking trails will solve this problem.

Thank you,

Kris Goldizen

Subject: Fells Plans Comments

Hello:

I thought you did a good job facilitating the other night. Thanks for the work you have done.

From my perspective, I see dogs as a big issue. People allow their dogs to swim in the water; they wander unleashed everywhere, and they don't pick up after their dogs, or they pick up but then leave the bags on trail.

I know the water is probably outside of your domain, however, the holes in the fence by the Sheepfold is one of their primary access points. Perhaps you are responsible for the fencing?

Subject: Page 47, implementation table clarification

Hi Paul,

In the implementation table on Page 47, the Winter closure policy is listed March 1 - April 15 and not March 1 - March 31 as described in several other places. I think the "as conditions warrant" makes sense though.

Just wanted to bring it to your attention.

Subject: Dark Hollow Pond Trail

Hi Paul,

Thank you for your presentation last night and the hard work that went into the draft plan. I will send comments on it to the public commentary when I've had time to go over it.

For now I would like to correct a naming error on the maps you had up in the hall (and in the draft plan) concerning the Dark Hollow POND Trail. It is not now, nor has it ever been called, the Dark Hollow Trail. Prior to 1994 there was a short Dark Hollow Trail blazed in yellow that split off from the DHPT on its southern end, turned west to the trestle road, crossed that and went south for 60 feet, then cut back over the hill that looks over the pond, ending at the top of Dark Hollow. This trail was dropped from the 1994 map, and its blaze color transferred to the DHPT, although the blazes were never removed or painted out from the abandoned trail.

There is also a portion of the DHPT that is in error on the maps. The northern end of the trail on the east side of Bear Hill is shown as being the one closer to Rt. 93 nearer the bottom of the hill. This is an unblazed illegal trail. The official trail is the one higher up the slope, closer to the summit, which is immediately evident if you study the official map. Last April I led a team of volunteers on Park Serve Day to clear and re-blaze the DHPT. It had originally been blazed in blue, but the blaze color on the trees was never changed to yellow when the new map came out in 1994, and blue was reassigned to the Cross Fells Trails. Given this, it's not surprising that the official trail fell out of use and there was some confusion as to which trail it was.

Subject: Middlesex Fells Trials Management Plan feedback
Middlesex Fells Trials Management Plan feedback

1. Provide pave multi-use trails that parallel the border roads and parkways. Currently most of the roads are dangerous for bicyclists. These roads are in a park and their traffic should be calmed, but separate paths might be the only solution for cyclists and pedestrians. It seems a shame that people feel that they need to drive to the Fells because the park roads are unsafe. Also, some of these roads should be returned to their original gravel state, and be closed on weekends and during the day so that cyclists and runners can use them.

2. In order to facilitate the natural experience while using the Fells install sound fencing along all the major automobile arteries through the Fells, or reduce speeds and traffic volume, so as to restore the natural silence that should be found in the Fells.

3. While self policing is a great goal we know this is not sufficient. Take as an example automobile drivers. How many of the drivers on the way home from the public meeting did not break a traffic law? If we as a society can not follow the laws for driving why are we going to follow the rules while in the woods. How often does some one get a ticket in the Fells? I have never seen a ranger or any other law enforcement personnel on the trails in the Fells.

4. A half million Americans a year get bitten by dogs. Just because there are many dogs in the Fells does not give them an inherent right to use the Fells. If you are going to require people to get permits to be off trail then there should be no dogs off leash and leashes should be limited to just several feet in length. Why should dogs have more privileges than people?

5. There is less than an hour window in the morning after a snow storm to ski on the trails before folks begin walking on the ski tracks. While it probably will never happen because people won't listen to the rules there should be cross country ski trails developed for skiers exclusive use for the few days a year that there is sufficient snow cover. Currently the only reliable place to ski is on the frozen ponds.

6. I disagree that there are only a few 100 spots that need trail work. I would say more than half the fire road mileage need major rebuilding so they become gravel/crushed stone paths again. This would provide access to the woods to people who otherwise can not navigate the rock trails including the elderly, the physically challenged, and people with strollers. It would also provide opportunity to recreate for those with bicycles but do not have mountain bikes.

7. I have spent several weekend afternoons pruning rose bushes off one the fire roads to make them passable. I have volunteered to do trail work with the Friends of the Fells but there seems to be no mechanism for me to get involved. Without significant commitment to fire road maintenance some of them are unsafe as multi-use trails. Some places are so overgrown that only a narrow path exists without room for people to pass. In other section there are so many loose rocks that they are dangerous. Bikes can kick up rocks, loose control, etc, people can sprain ankles.

8, While it might be true in general that mountain bikers and hikes have the same impact on a trail this it does not seem to be always true . When bikes pass through muddy areas they seem to have a much larger impact. Bikers also loosen small stones more than hikers, especially on steep uphill more.

9. Currently most of the fire roads, except those around the reservoirs on Winchester land, are in such bad condition that a runner is unable to maintain a smooth cadence. All effort should be made to officially allow use of the fire roads around the reservoirs . I have been

running on them for 30 years and they are a resource not found else where in the park. This appears to be because of two reasons: the roads around the reservoir have fewer steep grades and erode less quickly, and there has probably been occasional maintenance over the years.

10. Off trail use of the park is one of the reasons we have this park. I agree that groups larger than a certain size should have permits, but walking cross country is one of the things that children should learn to do. I think much more of an issue are the groups of mostly teenagers that go into the park to party, swim, drink and light campfires. If you can stop this type of use many of the side trails would disappear.

11. I have been taking climbers into the Fells for 25 years with the AMC and MITOC. Climbing requires off trail use of the park. In general the climbing areas are cleaner than the other rocky areas of the park because the climbers pick up the trash. Climbing is mostly localized to the south east corner, constraining its impact. This use should not be infringed. I can be the contact person for rock climbing or you can contact Paul Dale of the AMC [Mountaineering Committee](#) or the [Access Fund](#), who routinely negotiate climbing management policy with local and federal governments.

12. Trash barrels should be provide at the park entrances and major intersections. One is more likely to pick up someone else's trash if it can dispose of it in a short while.

13. Prescribed burns should be done periodically to control invasive species and help prevent catastrophic fires. Smoking should be prohibited in the summer in the park.

14. If all trail are going to routed away from wetlands, then boardwalks should be built with viewing areas so that people can observe some of the wet lands.

Thank you for a chance to comment on you plan.

Dr. Stephen Paul Linder

Phone message 9/23/10

John Pignoni

Wakfield (formerly Stoneham)

I would like to express my deep concern about off-leash dogs in Fells. I have a particular perspective in which my nose has basically been bitten off by my neighbor's pit bull and my mother has been bitten by a Yorkshire terrier. These were not in the Fells, but these were two different dogs that can bite. My mother's bite caused her to get an infection.

I strongly disagree with any opinion that allows off-leash dogs at the Fells. This is a very sensitive area. The fact that 400 hundred condos are going up in the area will make matters worse. By making an off-leash dog area would exacerbate the issue and everyone would run amuck in the Fells. Owners believe this is a right, but I do not believe it is.

I have been walking the trails and ponds, and the fact that your rangers can't defend the fishing in that area is causing concern. On weekends when your rangers do not work there are a lot of violations.

Subject: Thank you..

I live in Cambridge and work at Lawrence Memorial Hospital in Medford and have been using the the Fells since 1996 for running, hiking, biking and skiing. The lack of good single track in the Fells has forced me to take my biking to Harold Parker and Wompatck which are both pretty far from Cambridge. I am very green and have been resentful that the Fells (especially the orange loop) has been so shut off to bikers because of hikers not wanting to share the trails and that I have to waste gas just to go ride some decent single-track. It is a sad state of affairs when a single group of people can have so much power. I mostly hike the fells and when I do see bikers they are very respectful of my safety. I am delighted that the Orange loop will be opened up to bikers and truly hope it will stay that way. NEMBA is a great organization and I know they will help take wonderful care of the Reservoir trail. I personally will too as I do everywhere I bike. Thank you again for making the Fells a more equitable place for all users.

Subject: Dark Hollow Pond Trail

The current DCR Trail System proposals have prompted me to share a relevant project that I've been working on this Summer. As a biologist finishing up a floristic survey of the Fells I wanted to contribute something to the Reservation as part of the United Nations International Year of Biodiversity. For this I chose to delineate the unique features which can be observed following the Dark Hollow Pond Trail, at the observation points described below.

Please note that this official trail is blazed in yellow as found on the current map of the Fells, and has nothing to do with the unblazed, illegal trail incorrectly referred to as the "Dark Hollow Trail" in the DCR Trail System draft section 6.9. This section proposes creating "1-3 official designated multi-use routes" in this area which is in contradiction to section 6.1, which calls for eliminating redundant trails. There is already an official trail here, the Dark Hollow Pond Trail, which is a great hiking trail. There are a few fall lines that need to be corrected on it, but the proposed illegal trails have just as many fall lines that would also need to be corrected, thus using this argument to close the official trail in favor of the illegal trails is specious. Granting legal status to illegal trails would reward bad behavior by encouraging people to make more illegal trails wherever they want to have a

new trail, contrary to the goals of section 6.1. The proposed new trail would use a section of illegal trail on Bear Hill that is very close to Rt. 93. In one area the trail is only 10 feet from the rusty chain-link fence and in full view and sound of the noisy highway. The official Dark Hollow Pond Trail by contrast is much further up-slope away from the highway and much quieter and more enjoyable as a result. Finally, section 6.1 also calls for the elimination of spider-web trails north of Dark Hollow Pond, but routing a new trail through the area on existing illegal trails would enable access to these spider-web trails, making it harder to keep them closed. Closing all the illegal trails into and through this area would make enforcement of illegal trail closures much simpler. The current official Dark Hollow Pond Trail doesn't have spider-web trails coming off it in this area, and is thus the logical trail to retain.

Nature Trails in the Middlesex Fells Reservation
Discovering the Dark Hollow Pond Trail
By Walter Kittredge, Botanist
Harvard University Herbaria
©2010

The Middlesex Fells Reservation provides a great diversity of topography, geology, wildlife and plants to explore, and the Dark Hollow Pond Trail is a great place to start. The trail is 3/4 of a mile long travelling north and south parallel to Rt. 93. Access is from parking on Fallon Road near the fire road at gate 21 on the north side of Bear Hill. The trail skirts the east flank of Bear Hill, crosses a fire road and then the old trolley road, finally hugging the west shore of Dark Hollow Pond, ending at gate 24. In its short course it passes through over a dozen different habitats.

Habitat 1 - Roadside

A short walk from Fallon Road along the fire road to Bear Hill brings you to the trailhead. As is typical of many entry areas, the roadway is full of introduced and invasive plants, which results when native vegetation is removed and a permanent opening is created in the forest. Roadways fragment the forest by cutting into it and providing avenues for non-native plants to penetrate into the interior. Look for one of the most common invasives found along roadways which is Mugwort with its silvery lobed leaves and allergy causing pollen. Many invasive plants produce prolific fruit at a young age that are widely spread by birds, such as Multiflora Rose, Glossy Buckthorn and the Oriental Bittersweet vine. Fortunately there is a positive side to roadways as well, as these sunny open edges are also habitat for native plants like Pussy Willow that provides the first prolific pollen and nectar for bees. Black Cherries bloom and fruit abundantly here. Look for tent caterpillar nests in their branches, which provide protein for birds to raise their young. Several kinds of Blackberries grow here with berries that are enjoyed by birds and people alike. Look for the low arching Bristly Blackberry which has long soft bristles, the tall arching Allegheny Blackberry with its stout prickles, and the bluish canes of Black Raspberry.

Habitat 2 – White Pine-Oak-Beech Forest

As you start up the trail just to the right (west) is a small cluster of Beech mixed with White Pine and Oak. Note the large dead tree trunk with a ring of Beech trees around it, and a

second ring of saplings around them. Beech trees sprout from the root and this colonial expansion is much faster than can be accomplished by seedlings. Many of the stands of Beech you see in the forest are derived from the roots of a single tree. Unlike Oak, Beech is very sensitive to fire, and so its increase in the Fells has been aided by the suppression of forest fires. Climate change may also be playing a part, as total rainfall for New England has increased 5% in the last thirty years. A third factor is that as the forest matures it makes a dense overhead canopy of shade, resulting in the forest becoming cooler and moister. All these factors together create a feedback loop of increasingly moist microclimates favoring Beech and Maple over Oak and Pine.

Habitat 3 - Mixed Oak Forest

The trail begins in a forest of Mixed Oak trees at the base of the north side of Bear Hill, the highest hill in the Fells at 317 feet. Mature Black Birch with its shiny black bark is common among the Oaks here, indicating there had been a fire in this area many years ago, as birches are a pioneer species whose seeds require bare soil for germination. Black Birch is also called Sweet Birch because the twigs taste of wintergreen. Fire favors Oaks which have fire-tolerant bark, and re-sprout from the base if the tops are killed. The Oaks are mature with high crowns that create deep shade and a sparse open understory. Mapleleaf Viburnum grows here with showy white flowers in May and dark blue fruit in Fall, and is one of the commonest woodland shrubs in the Fells. The fruit is a drupe, like cherries, with a fleshy outer coating around a single hard stone containing the seed. In Spring look for the white woodland flowers of Wild Sarsaparilla, Solomon's-seal, Starflower and Mayflower. In the Fall the first two have blue berries, the Twinflower's are white, and the Mayflower's are red. Colonies of White Wood Asters add some late season color to the forest floor.

Habitat 4 - Hemlock-White Pine-Oak Forest

As the trail begins to climb up a steep slope there is a grove of Witch-Hazel shrubs with wide scalloped leaves. Their flowers are the last to bloom in the Fall with four narrow wavy yellow petals. The number of evergreen trees increases quickly as the trail enters Hemlock-White Pine-Oak Forest. Hemlock forests are typical of steep cooler north and east slopes, and this one wraps around the hill following the trail along the east slope. Hemlocks are under attack from the invasive Woolly Adelgid which was introduced from Asia. These insects suck the sap from the tree reducing the food available to it until it dies. Look for the egg sacks which look like a cottony white mass on the branches. Control by spraying pesticides is impractical on a forest scale, but there may be hope from biological controls now being explored. As the Hemlocks die off they are mostly succeeded by the pioneer tree Black Birch, and by Sugar Maple. The soft delicate sprays of fern here are the sweet-smelling Hay-scented Fern. Look for mats of small dark green evergreen leaves that are creeping Partridgeberry. It has sweet-scented paired tubular white flowers in the Summer, followed by red berries with two "eyes," where the flowers grew.

Habitat 5 - Red Oak-Sugar Maple Transition Forest

As you continue along the level trail notice the increase in Sugar Maple trees signifying a shift in the forest composition. Sugar Maples, like Beeches, thrive in the absence of fire. There is a large wind-snapped White Pine tree here that has fallen creating a gap in the forest. As the tree trunk rots it will provide habitat for wood rotting fungi, mosses, insects

and animals. The pile of brush it left provides cover for birds and chipmunks. This new sunny opening will allow the understory saplings of mostly Sugar Maple and a few Red Oaks to grow up rapidly, replacing the evergreen trees. Just beyond the fallen pine is a large dying Hemlock. Looking up into its canopy you can see there is very little green left. As the trail climbs again there are Poison Ivy vines with their three shiny leaves. At the top of the hill the trail passes between Allegheny Blackberry with five leaflets on the left, and Red Raspberry with three leaflets whitened below on the right. Another thorny plant here is Catbrier or Greenbrier, a climbing vine with green branches and large round leaves.

Habitat 6 - Forest Seep Community

The trail now dips down into a hollow with a nice rock seat overlooking it. There is a Forest Seep in the cove here, the extra moisture encouraging a lush growth of ferns like the evergreen Christmas Fern, which provides year-round greenery. Other ferns to look for are Cinnamon Fern with narrow erect cinnamon brown fertile fronds in the Spring, and the graceful Lady Fern, which can be recognized by the deep groove on the upper side of its stem. There are thirty-four Ferns and Fern allies in the Fells, mostly found in shady moist areas, with the exception of Bracken Fern, which grows in dry woodlands. Moist habitats like this are the most common place to find large tall straight Ash trees with their feathery compound leaves. Look for Solomon's-s-Seal with greenish hanging paired flowers followed by blue berries, and False Solomon's-seal with a terminal bunch of white flowers followed by red berries. Climbing out of the seep the forest has a rich mix of large Hemlock, White Pine, Red Oak, Shagbark Hickory, White Ash and Sugar Maple trees. Look for the lavender flowers of Wild Geranium here with its palmately lobed leaves. The creeping vine with five leaflets is Woodbine or Virginia Creeper, a relative of grapes.

Habitat 7 - Hickory-Hop Hornbeam Woodland

At the top of the next rise the trail passes to one side of a sunny habitat where the canopy thins out and the trees are much shorter. The dominant trees are Pignut Hickory with shiny compound leaves and tight blocky bark. Hop Hornbeam growing with them in the understory has curly strips of bark giving them a shaggy dog look. The grassy looking ground cover is Pennsylvania Sedge, the most common sedge in the Fells. The evergreen tree and saplings here are Red Cedar, which is a pioneer species that requires the full sun of open areas. This habitat often occurs on south and east upper slopes just below rock outcrops and summits.

Habitat 8 - Circumneutral Talus Slope

As the path descends into another cove there is a sprawling plant of Bedstraw with eight leaves at each joint, and tiny white flowers. At the bottom of the slope the trail joins an illegal trail and passes along the base of a Circumneutral Talus Slope. The rocks and soil are loose and still moving, making this a naturally disturbed habitat. There are several interesting plants growing here including Bloodroot, Early Buttercup, and Early Saxifrage, and a small tree of Hackberry. Due to the natural disturbance there are also a lot of invasive plants on the slope including Garlic Mustard, Oriental Bittersweet and Black Jetbead, which is a new invasive with large white flowers in the Spring and black berries in the Fall. Look for a large tree with long strips of bark peeling off, this is a Shagbark Hickory.

Habitat 9 - Rich Mesic Forest

At the bottom of the talus slope is a habitat that is dominated by Sugar Maple with Bitternut Hickory, Basswood, Elm, and White Ash trees. This forest typically occurs in east-facing mid-slope coves like this, and have very deep rich topsoils, up to two feet deep here. Leaf litter is mostly absent as the soft Maple leaves decompose rapidly. Look for the ferny leaves and tiny white flowers of Sweet Cicely, and the stiff many-lobed leaves of the related Sanicle. There are three springs beside the trail that create another ferny Forest Seep here. Look for the purple-hooded three-leaved Jack-in-the-Pulpit in Spring, and its spike of red berries in the Fall. Just before the trail turns left there is an American Elm tree with a fluted base and rough serrate leaves. Across the trail from it is a Pagoda Dogwood bush. Unlike all the other Dogwoods this species has alternate leaves. A leaf slowly pulled apart will have silky sap threads connecting the veins. A short distance off the trail up the fire road in the opposite direction there is a giant Bitternut Hickory tree on the left. It is over 90 feet tall, 8 feet around and probably about 200 years old. After over a century of growth without cutting, the Fells is now a complex ecosystem that is self-regulated and self-directed, rather than being managed by humans. As a result there are trees of all age classes with giant trees like this, large snags and downed logs, many mature trees, and even more saplings in gaps. This vertical complexity creates ideal habitat conditions for wildlife, which is very diverse in the Fells as a result.

Habitat 10 - Woodland Vernal Pool

Following the trail down the fire road there is a small Woodland Vernal Pool away to the left, which is fed by the streams that run down into it through the Forest Seep. Vernal pools are the only habitat that salamanders, wood frogs, and fairy shrimp breed in. The salamanders and frogs live in the woodlands surrounding the pool. There are over 100 vernal pools in the Fells making it one of the most important conservation areas for this habitat. In Spring, look for the deep blue flowers of Blue Marsh Violet mingling with the bright yellow flowers of Golden Ragwort.

Habitat 11 - Red Maple Swamp Forest

The outlet stream from the vernal pool meanders through a Red Maple Swamp. There is a very large American Elm tree here with a large fluted base. This buttressing helps anchor the tree as its roots in the wetland are very shallow, staying near the surface to maximize the amount of air available to them. Elms growing on dry soils don't exhibit this trait. Most Elms succumb to Dutch Elm Disease before they get this large. This tree is either resistant to the disease or is isolated enough to have escaped it. Poison Ivy with its three shiny leaflets grows lushly here, both as a low shrub and a vine climbing the trees. Jewelweed, an herb with juicy stems and showy orange flowers also grows in the swamp, and is an antidote to the rash caused by Poison Ivy.

Habitat 12 – Oak Forests

Leaving the fire road the trail goes right (south) and enters a mosaic of Mixed Oak, Oak-Hickory and White Pine – Oak Forest habitats, that grow from here to the Trolley Road. Notice that the Sugar Maple starts to drop out as you move away from the Rich Mesic Forest. The distinction between these habitats is not large, mainly being a matter of the presence or absence of White Pine and Pignut or Shagbark Hickory growing with the Oaks.

Look for delicate drifts of Windflower in the Spring, with their large single white flowers above five-parted leaves. The trail now comes to the old bed of the trolley line left from the days when a trolley ran through the Fells with a stop at the Sheepfold.

Habitat 13 - Pond Community

The trail crosses the end of the trolley road and enters a small hollow on the north end of Dark Hollow Pond. The Beech forest here is protected from fire by growing in this moist area. Beeches are very common along the cool east-facing slopes of the west shore. The pond itself is part of the Mystic River Watershed, as is the entire Fells. Runoff from the highway has resulted in the water being a cloudy greenish color. With only a few intermittent streams feeding the pond there is almost no flushing and so pollutants are concentrated. White and Yellow Water Lilies thrive in the enriched water, as do the submersed strings of feathery-leaved Milfoil. Look for Black Cormorants that fly in from the coast to fish here.

Habitat 14 - Shoreline Community

The shoreline is ringed with patches of the tall invasive Giant Reed Grass which thrives in the saline water caused by road salt. Invasive plants of Gray Willow and Yellow Iris are also common on the shoreline, all of which crowd out the native shrubs of Highbush Blueberry, Sweet Pepperbush, Canadian Shadbush, Swamp Azalea, Fetterbush, and Silky Dogwood. These shrubs with their white flowers provide pollen and nectar for bees, leaves for high-protein caterpillars to eat, which birds use to raise their brood, cover for nests, and berries for mature birds to feed on. The invasive plants provide nothing in the way of food as no native insects eat them, and they make no edible fruit. Halfway along the trail you come out on a sunny rocky promontory with a very scenic view down the length of the pond. Beyond that the trail passes by the bottom of the trolley line Trestle Bridge, which is very impressive seen from below. The trail continues along the west shore with scenic views of the pond all the way to its south end at gate 24.

Subject: Clarification

Hi Paul

Can I get a quick clarification from you. In reference to designating the Virginia Wood trail as pedestrian-only:

-Does that mean just the singletrack in that area, or would that ban bikes from the fireroads too?

-Also when you say Virginia Wood, do you mean the entire rectangle of Fells between Pond St/Woodland Rd/Ravine Rd/Fellsway East? Or is the Virginia Wood subset of that block of land?

Thanks

John

September 27, 2010

Mr. Joe Orfant

Director of Planning and Resource Protection

Department of Conservation and Recreation

251 Causeway Street

Boston, MA 02114

Dear Mr. Orfant:

Thank you for the presentation of the Draft Trail System Plan for the Middlesex Fells Reservation on Monday night, September 20th. This letter seeks clarification of several key differences between what was presented at the meeting and what is contained in the draft that became available on the 21st. We will be providing more detailed responses during the comment period, but we wanted to get clarification quickly to better understand the draft plan. We suggest that clarifications in response to this letter be posted on the DCR web site so the public too can benefit from a better understanding of what changes are proposed at the Fells and the implementation schedule.

We understand and appreciate that DCR has devoted resources and worked hard on this draft, and we look forward to continuing to work with you to improve it and to provide input on the full Resource Management Plan (RMP) slated to begin in November.

We ask that you please clarify in writing the following:

- Will any decisions in the draft Trail Plan or actions proposed therein be taken before the end of the comment period in November?
- Which actions do you anticipate will be implemented after the comment period has ended but before the full RMP is completed?
- How and why was it decided that some issues would be decided through the RMP process and others would be implemented prior to the completion of an RMP?

Specifically, we are confused about the timing indicated in the table that begins on page 46 of the draft and what participants in the public meeting heard on Monday night.

Our understanding based on the presentation was that the draft Trail Plan would be a component of a full RMP and that no significant changes in trail use would be made until that process was completed. However, in response to a question from an attendee at the presentation, Paul indicated that the proposed change to the Reservoir Trail might occur before the RMP is completed. The table in the draft also indicates that other important actions will occur before the planned RMP process is complete—not only for the Reservoir Trail, but for the Dark Hollow Pond route, for the winter closure policy for mountain biking, for areas designated as off-leash for dogs and establishment of a hiking-only area. We believe these are all significant management decisions that would best be decided in the context of the full RMP process along with the many other trail management options outlined in the draft plan's suggested implementation schedule. For the RMP process to be meaningful and credible, these decisions should not be finalized and implemented outside of it.

We agree that implementation measures that would not significantly change the nature of a trail could take place before the RMP process is complete, including increased enforcement, improved signage, creation of trail maps, public education, and closing redundant trails. Thank you for responding to our questions. We appreciate that DCR is dedicating the resources for an RMP for the Middlesex Fells Reservation to help inform decisions at the complex and highly used location. We know that a significant amount of new data on natural resources found in the Fells will be available shortly and should be considered in decisions for changing existing trails or uses.

Subject: conversion of Reservation begins

Conrad,

The sense of disappointment and disillusionment found in the September 27 letter sent by the AMC, TTOR, Sierra Club, and the Environmental League [cc'd to you] stems directly from the assurances made by Commissioner Sullivan in his letter earlier this month sent those groups that the Fells Trails System Plan would essentially remain in draft form until a RMP process had been completed, save for protective measures:

["Enforcement and Conflict Issues"](#)

[You note the importance of addressing enforcement and user conflict issues at the Middlesex Fells now. We agree, and this is precisely why it is important for us to move forward with the Trail System planning process, even in advance of the completion of the](#)

RMP. As you note, addressing these issues at the Fells is important for both resource protection and the recreational experience, and I trust you will see how the recommendations of the Trail System Plan move us forward in this regard.

Conclusion and Recommendation

Finally, I would like to thank you again for your comments and participation in this process. I am pleased that we are able to meet your concerns by advancing the timeline for the RMP for the Fells, and also as you suggest, by moving forward with many of the recommendations of the draft trails plan including closure of bootleg trails, signage, education, enforcement and addressing user conflict.”

[Sullivan email to McCaffrey, September 2, 2010]

Instead, the 50 page Plan puts forth an agenda, phased to begin immediately, to convert hiking trails to bike use to “Improve the Mountain Biking Trail User Experience”:

DCR proposals for *conversion* to mountain bike use:

- Reservoir Trail
- Dark Hollow Pond Trail
- Cross Fells Trail
- Crystal Springs Trail

Create *new* mountain bike trails:

- Create three mountain bike trails from Bear Hill Parking area to Sheepfold
- Create mountain bike trail from Flynn Rink to southern end of Spot Pond

The authors of the report deny outright the unique natural qualities of the forest Reservation which have been preserved since the Fells inception in 1894.

Instead of honoring and truly protecting the natural features of the Fells which serve as refuge for foxes, coyotes, scores of vernal pools and a documented 851 plant species including 567 *native* species, providing young and old alike refuge from the world of concrete and machines, the DCR report states that it is imperative to **"Improve the Mountain Biking Trail User Experience"** beginning with the immediate conversion of one of the most family used trails — the Reservoir Trail — into a bike trail.

The report re-frames the Fells Forest Reservation as a "urban park" where solitude is not a value to be expected:

However, the Fells is a popular and heavily used destination. It is not a wilderness area. While users may be able to find moments of solitude in the Fells at certain places, seasons or times of the day, users should not necessarily expect to find solitude in all instances, nor expect that moments of solitude might not be disturbed by other users. [p. 28]

Audubon has classified the Fells as an 'Important Bird Area' [IBA] due to the Reservation's rare setting providing contiguous forest cover serving migrating birds, but to Paul Jahnige, the report's author, the most pressing needs are to begin aggressively converting the

majority of Fells trails into bike trails, beyond the 35 miles of trails already permitted and unimpeded illegal bike use already present.

Note that there is **no enforcement** of **any** of the rules and regulations [pp. 36-37]. Not one word about issuing citations and levying fines for any infractions of Fells regulations. **Not one word about DCR teaming up with the State Police for such enforcement capacity as the SP has stated they are willing and able to do.**

Two seasonal rangers is the sum and substance of the DCR enforcement plan. 'Seasonal' means that at the end of this month these rangers are not present in the Fells any more, **and during the 'season' the rangers have zero enforcement power throughout the 2500 acre Reservation.**

No, according to Jahnige: '**self education**' and '**etiquette**' are offered as solutions in the (continued) absence of enforcement. Bikers laugh at such nonsense. Don't believe me? Review biker posts here: <http://www.nemba.org/forums/showthread.php?26158-DCR-s-Fells-Draft-Plan-is-now-available>

Opening up hiking trails to bikes without enforcement is tantamount to signaling that the *entire* Fells is fair game for bikers, given that **bikers use permitted trails as feeder trails for riding wherever they decide would be more fun.** The stamp of legitimacy will fuel NEMBA to herald the Fells as a new bike mecca and will bring a bold new presence of bikes into all sectors.

The report, and Jahnige's presentation on Sept. 20, repeats the demonstrable lie — verbatim NEMBA propaganda points — that boots and bikes are equal in their impacts on natural features, despite, for example, the obvious fact that bikers can cover exponentially greater distances for any given unit of time. The Trails Plan report denies universal, on-the-ground evidence that the physics of machine use grinds up and widens trails, and that widespread bike use displaces hikers and all other classes of passive visitors from trails. See attachment below.

By caving in to bikers and dog owners demands prior to the RMP process DCR policy makers have poisoned any chance that the ensuing RMP process will be perceived as legitimate or meaningful in any way. Yet it is stated on page 4 of the Trails Plan that, **The Middlesex Fells Trail System Plan is the first such plan undertaken by the agency. It is intended to serve as a template for future trail system plans.**

Any way to salvage the upcoming train wreck which will reverberate from Boston to the Berkshires? Yes: **the Fells Trails System Plan must remain in draft form while a Fells RMP is underway.**

Regards,

Mike

PS The lie and myth of right of 'equal access' is based on the demonstrably false claims of 'equal impacts'; I challenge any policy maker at DCR to read the following document and attempt to refute any of its key points.

From: Elizabeth M. Ammons [mailto:]
Sent: Tuesday, September 28, 2010 2:53 PM
To: Jahnige, Paul (DCR)
Subject: Re:

Dear Paul Jahnige and colleagues at the DCR,

I am happy to see the draft of the document. Much of it looks really good. My chief concerns, a number of which the document supports, are:

--No night use of the Fells, especially by mountain bikes. It would be far too disruptive to animals who live there.

--No expansion of mountain bike trails. What exists is fine.

--Elimination of bootleg mountain bike trails. It is important to close these so the earth can recover.

--Continuation of the policy of no mountain biking from December through March. Limiting this closure to March only is too short a window to allow the forest a dormant period free from anything but foot and ski use.

--Ranger presence in the Fells so that a friendly reminder exists that the forest is not a free-for-all zone.

--Good clear posting of regulations at the entrances.

I have walked in the Fells for over three decades and seen damage mount, unfortunately, with mountain bike use. Bikers who stay on the approved trails are great. I have no issue with that. But bikers off trail do enormous damage. My hope is that the situation will improve.

thanks--

Liz Ammons

Medford, MA 02155

Dear Commissioner Sullivan and Colleagues,

Unfortunately, I was unable to attend the September 20th meeting. The following are my views on the Fells.

I have been running and hiking in the Fells for 38 years. For all this time, I have spent on average 3-5 hours per week in the Fells. Living in the Washington School area of Winchester, I have also been drinking water from the Fells during this period.

During the past several years, essentially everyone flaunts all of the posted rules because there is no enforcement of the rules, no patrolling of the reservoirs. Without resuming the patrols, at least of the restricted areas, I see no hope that new policies or regulations will have any affect at all.

Mountain bikes: They are really tearing up the Fells. Once narrow hiking trails have been widened in places to 30 feet or more, and the trails are full of raised rocks and tree roots because the bikes have torn the soil away. In some places, there is heavy erosion and water bars, bike jumps, etc. have been constructed helter-skelter. The riders often pass me at extreme speed, and where the trails are narrow, I must jump aside, sometimes very quickly. They ride anywhere and everywhere, even on trails there are clear postings that bikes are not allowed. I could go on, but I see no point. I recognize mountain biking as a good sport, and I admire some of the rider. I would like to see them enjoy themselves in the Fells, but request that they be allowed only on trails marked for them. This would, of course, require strict enforcement, and there is absolutely none at present, as far as I have seen.

Dogs: It is very unusual to see a dog on a leash (1 in 50?). Even to see a dog owner carrying a leash is extraordinary (1 in 25?). I have often been charged by dogs (at least once per month), bearing their fangs and barking loudly. Sometimes their master is not even present or is riding by at high speed on a bike. When I can, I ask the person civilly to "please call your dog off." More than half the time, the person is angry at me for making this request. Apparently, some people love their dogs so much, or identify so strongly with them, that my request is an affront. I was severely bitten once in the Fells, and I am afraid of some of the dogs. Meanwhile, I do not appreciate being sniffed, lapped and barked at by even "safe" dogs. Again, I understand the joy that dogs give people, just as I have loved owning cats. But I request that the dogs be leashed, as per the regulations. It would take a lot of enforcement to make that happen because presently the dog owners feel very entitled. Perhaps the thing that disturbs me most is to see dogs swimming in the reservoirs,

which, apart from winter, I see happening at least once a week.

Miscellaneous: On occasion (in order of occurrence and seasonally), I have seen people fishing, swimming, fornicating and on two occasions I saw horseback riders on the road along the east side of the middle reservoir. I have seen a number of parties with fires, and know of several active fire pits, adjacent to the reservoirs. I will admit that I walk off the trails (I have been mapping the stone walls), and during the past couple of years, I have found three camps of apparently homeless people, who have spent weeks or many months living deep in the Fells.

The Fells parkland has been seriously degraded in recent years, especially since the policing of the reservoir land ceased. Absolutely no notice is taken of the many posted signs, as far as I can tell.

The Fells is in trouble. It will take a lot of commitment to turn things around. I wish you the very best in your stewardship of this magnificent resource, which must be the envy of any major city in this country.

Sincerely,

Jeff McClintock

Winchester, MA 01890

Dear Commissioner Sullivan:

I'm very concerned about the proposed changes to the use of the Middlesex Fells and I am writing to urge you to make sure the review process for any changes is completed in accordance with state law.

As you are no doubt aware, the Fells is a fantastic resource for a wide range of community members--families with children, runners, bikers, birders, hikers, etc. I believe strongly that the Fells needs to continue to serve this broad constituency and not become a mountain bike park. I use the Fells for all of the above purposes, including mountain biking, but I don't want people biking around me as I enjoy a leisurely walk or try to see some wildlife, or as I admire the lady's slipper orchids blooming in the spring. It is important to thoughtfully plan and manage trails in the Fells to make sure it serves all constituencies and is preserved for future generations.

Please do everything you can to ensure that any proposed changes to the Fells go through the review process that is state law.

I understand that budgets are tight, but the Fells desperately needs more funding and management from the DCR. It is hugely underfunded and should be made a higher priority.

Sincerely,
Jeana McNeil

Subject: Middlesex Fells Trails & Access for Bikers

I am very concerned about the potential impact of bikers on the Fells trails. I have biked there myself, and am glad that certain of the wider trails are open to bikes, but would not like to see the smaller, more remote trails opened to bikes. The damage to the trails and impact on the surrounding wildlife could be devastating. I urge you to do a complete and thorough review of this issue before changing the access rules.

Thank you,

Subject: Fells mountain bike park?

Hello Mr Sullivan,
I enjoy a good bike ride and I also enjoy a peaceful, quiet walk in the woods with my dog. As I get older, more of the later. Please keep these activities segregated and keep the Fells safe for hikers. There are plenty of legal bike trails there already. Please don't turn the Fells into a mountain bike park, grind up the landscape and drive out all the hikers. That would be just awful.

Thank you for your attention.

Subject: Middlesex Fells

I am writing with concern about the process (and potential outcome) of the decision-making about the Middlesex Fells. In order to preserve the natural wilderness it is important to maintain the majority of trails as footpaths rather than allow access to mountain bikers. On numerous occasions, while walking in the Fells I have come across bikers who are traveling at the edges of the trails, thus widening them from the narrow tracks, and destroying the natural habitat. There are many miles of trails in the Fells already designated as available to mt. bikes. These are trails that I try to avoid, as it is very unsettling (at the very least, and dangerous at the most) to suddenly encounter bikers traveling (typically at high speeds) without regard to potential pedestrians. Please preserve the trails that remain open to foot traffic for the majority of the public, who are looking for an authentic way to experience our natural habitat.

Thank you,
Ann Easterbrooks

Subject: No Mountain Bikes in Fells Forest Reservation !!

I find it reprehensible that you would consider allowing ANY mountain biking in Fells Forest Reservation Park!!

I have been a hiker and backpacker for many years. In my experience, mountain bikers care not about the quiet beauty of any place . . . they are after the challenge, and thrill. Too often, I have witnessed, that this thrill-seeking comes in the form of cutting down trees, laying them across trails, and creating a ramp/jump for more thrills. This is only one negative facet.

Mountain bikers very often come zooming down narrow, or single-track, trails which might be populated by people on foot, or wildlife, who have no time to move out of the way. A friend of mine was left with a broken collar bone, and the mountain biker apologized, saying "I thought you were a kid." She was at the back of the line of hikers, and couldn't jump out of the way fast enough.

The noise of these mechanical devices is enough to scare wildlife away from their own habitat! And, it is all too common that we see trails "cut" by bicycles, crossing the existing switchback trail in order to exaggerate the biker's downhill thrills – destroying vegetation and causing erosion.

Oh yes, erosion. As the mountain bikers careen around corners, the compacted soil becomes loose, and grooves form, making for certain erosion when the rains come. This

also happens on up-hill and down-hill portions of trails because of the wheel-spinning and braking actions of the bikes.

Mountain bikers have the same rights to enter these pristine areas on foot, as the rest of us. I advocate for the plants, wildlife, and peace, and serenity of all.

Please ban mountain biking in ALL parks, and wilderness.

Thank you for your consideration,

Joan S Weaver

Subject: Middlesex Fells trails policy

Dear Sir or Madam:

I write to express my grave concern over the proposed changes to trail policy in the Middlesex Fells that would allow mountain bikes on the current hiking trails. As a frequent user of the Fells both as a hiker and a biker, I greatly appreciate the current distinction between the two categories of trails. Allowing bikes on hiking trails would disrupt the calm that people seek on those trails. Hiking the Fells is a precious mini-wilderness adventure easily accessible to our urban/suburban population. I brought up my kids hiking and biking the Fells, and they emerged with a love of the outdoors. There are plenty of biking trails in the Fells, including a very challenging loop trail. The hiking trails should be preserved for hikers. In any case, there should be no consideration of changes in Fells trails access policy until a Fells Resource Management Plan is completed as required by Mass General Law.

Thank you for considering my concern.

Sincerely,

Daniel J. Jacob

Subject: Fells Reservation

Bicycles and other large pieces of machinery are extremely destructive to nature and should be restricted to pavement. Please don't fall for the mountain bikers' propaganda!

Bicycles should not be allowed in any natural area. They are inanimate objects and have no rights. There is also no right to mountain bike. That was settled in federal court in 1994: <http://home.pacbell.net/mjvande/mtb10> . It's dishonest of mountain bikers to say that they don't have access to trails closed to bikes. They have EXACTLY the same access as everyone else -- ON FOOT! Why isn't that good enough for mountain bikers? They are all capable of walking....

A favorite myth of mountain bikers is that mountain biking is no more harmful to wildlife, people, and the environment than hiking, and that science supports that view. Of course, it's not true. To settle the matter once and for all, I read all of the research they cited, and wrote a review of the research on mountain biking impacts (see <http://home.pacbell.net/mjvande/scb7>). I found that of the seven studies they cited, (1) all were written by mountain bikers, and (2) in every case, the authors misinterpreted their own data, in order to come to the conclusion that they favored. They also studiously avoided mentioning another scientific study (Wisdom et al) which did not favor mountain biking, and came to the opposite conclusions.

Those were all experimental studies. Two other studies (by White et al and by Jeff Marion) used a survey design, which is inherently incapable of answering that question (comparing hiking with mountain biking). I only mention them because mountain bikers often cite them, but scientifically, they are worthless.

Mountain biking accelerates erosion, creates V-shaped ruts, kills small animals and plants on and next to the trail, drives wildlife and other trail users out of the area, and, worst of all, teaches kids that the rough treatment of nature is okay (it's NOT!). What's good about THAT?

For more information: <http://home.pacbell.net/mjvande/mtbfaq> .

--

I am working on creating wildlife habitat that is off-limits to humans ("pure habitat"). Want to help? (I spent the previous 8 years fighting auto dependence and road construction.)

Subject: Fells Trail Plan Comments
Dear Fells Trail Planners:

The DCR Plan is beginning to sound a lot like our District of North Vancouver (DNV), BC Canada "plan" for mountain biking on our Mount Fromme forest and park. Let me just say this: ***It does not work!*** The Friends of Fell have stated it well what the problem is with your planning process:

"Despite assurances to the contrary to elected officials and environmental groups by Commissioner Sullivan, on September 21 the DCR released a [plan](#) proposing immediate conversion of Fells Reservation hiking trails to mountain bike use, prior to the beginning of a Resource Management Plan process."

This would be a very unwise move by the DCR authorities. A very similar (and very undemocratic) thing happened with our own District's plan. This move alone by any public land authorities ultimately makes for a mockery of democratic public process, while giving too much power to just one self interest group/stakeholder.

Our own District's (DNV) unfair and biased public process turned into a literal "free for all" for mountain bikers, effectively shutting out every other stakeholder over the "plan". Now we have to deal with the aggressive entitlement of mountain bikers who we will not be able to remove from the area, any time soon. **The damage to our trails, watersheds and overall "Natural Capital" is almost complete!**

Don't fall for the same ruse of the bikers because they are so vocal and pushy. They have also taken over our once peaceable adjacent neighbourhoods, out here. Our fate has become the sad legacy of our "mountain biking" Mayor, Richard Walton, who was also a long-time director/founder of the now-defunct "World Mountain Biking Conference". Environmental assessments have been completely ignored in order to appease the aggressive mountain bikers. Perhaps the non-mountain biking citizenry have also been too complacent about it. Nobody likes aggressive confrontation from any self-interest group (like the 5 to 6% population who mountain bike -- similar to the percentage of people who ski and snowboard, according to recreational surveys in past years)

"Our" mountain bikers brag, without fear, about many of their continuing illegal activities. Sanctioning their trails, does not stop illegal ones from being built... They have made a monkey out of our most complying District. DNV is now the "laughing stock" of the mountain biking world -- **and that alone should be a warning to those public landowners who are aiding and**

abetting mountain biking, ahead of proper and democratic public process! The more you reward bad behaviour, the worse it becomes.

The DCR's proposal to give something to the mountain bikers ahead of public process **would be a very bad move**, and give mountain bikers more power than they deserve. You can only give mountain bikers more power by working for them. The more you do this, the more likely these free wheelers will demand even more. Their appetite for trails and riding is insatiable.

The clout and money this sport has should make public landowners point it in the direction to purchase their own private property/recreational resorts to rip and shred on. **Mountain biking is a rich sport! They do not "need" our free public lands.** Plus, mountain biking activities just end up commercializing and privatizing our public forests and parkland, etc. **Just like skiing and snowboarding, mountain biking needs to be strictly contained where revenue can be collected, with amenities, and where mountain bikers will do no more environmental damage.** Thank you.

Subject: Re: Concerned citizen re: Middlesex Fells

Hi Paul,

Thank you for directing me to the Trail System Plan. I am glad to see that a comprehensive planning process is underway, and I can appreciate the challenges associated with putting together such a plan.

That said, I am VERY concerned about several items in the plan's recommendations:

On page 45 of the plan it states:

- Evaluate, through the RMP process, designating all or some portions of the Cross Fells and Crystal Springs Trails as a multiuse trails.
- Evaluate, through the RMP process, designating all official trails other than the Skyline and Rock Circuit as multi-use trails.

On page 47 of the plan it states: Change the Winter Closure Policy for Mountain Biking to March 1 to April 15 or as Conditions Warrant.

These proposed changes are absurd and must not be allowed to happen. I use the Fells for multiple purposes and like to mountain bike there but I do not support these changes at all. The idea of designating ALL official trails other than a few as multi-use trails is completely

ridiculous and skews the usage of the Fells toward a specific interest group, and will negatively impact other users.

Please include my feedback in the future consideration and planning for the Fells.

Sincerely,
Jeana McNeil

Subject: Protect the Middlesex Fells Reservation

Please protect the Middlesex Fells Reservation by preventing bicyclists from overrunning the area.

While I understand that the NEMBA does contribute to the maintenance and upkeep of the trails in the Fells, allowing mountain bikes on more trails in the Fells will degrade not only the trails, but the trails experience that the majority of users, those on foot, have.

As both a bicyclist and hiker, I feel it is imperative to have a bicycle-free system of trails in the area. Even now, where trails converge and bicyclists and hikers must share sections of trails, I find, whether intentional or not, that bicyclists can come up on hikers fast enough to scare hikers. In attempts to avoid hikers, I have seen bicyclists crash because they weren't in control and otherwise able to yield to hikers.

Even now, some bicyclists do ride on trails designated only for hikers. When in groups, they clog the trails at difficult sections as they wait for each rider to go one-by-one along such sections. Passing a group of cyclists while hiking in the Fells is not my idea of a pleasant hiking experience. Even when riding as individuals, I've had to stop hiking to wait for a bicyclist ahead of me, going in the same direction as me, to get past a rough spot. I've never had to stop while waiting to pass other hikers.

Please also consider that bicyclists are more likely to be "joiners" who band together in groups such as the NEMBA who can put more pressure on decision making entities than individuals. Hikers and walkers are often much more independent and are much less likely

to join such groups as Friends of the Fells. Most people hiking in the Fells probably have no idea that there's a movement for bicyclists to gain more access.

As for eliminating the ban on bicycles in the spring, if anything, the ban should be extended. Any time during the year, after heavy rains when there is a lot of standing water on the trail, bicycling should be restricted. In some cases, it may even be appropriate to limit hikers' access to the trails.

I appreciate your consideration as you continue to make long-term plans for the Fells.

Thank you,

Mara Factor

Subject: Letter responding to DCR Trails Plan

Here is my comment letter.

Dear Commissioner:

October 1st, 2010

I have read with care the 2010 Trail System Plan published by DCR. I visit the Fells trails steadily all spring, summer and fall, and have done so for over 30 years. I have watched while DCR staff and resources have been reduced and then reduced more, and I confess I am very skeptical that any "Trail Plan" can be implemented.

The partially felled and downed trees and the debris laden floor of the Fells forests are an invitation to serious accidents and, as this summer made clear, to fire set by vandals. A single tree downed and blocking the path at Long Pond has been lying unattended for over two weeks, through no fault of the Fells staff.....there are not enough hours in the day for them to resolve all the problems in their area of responsibility. I do not see too limited staff resources changing.

Winchester, in the last 18 months to two years, has been allowing public use of their trails, and although the town has a part time trail monitor, only swimming by dogs and humans seem to be the target of enforcement. I would suggest that the Winchester Waterworks are a fifth stewardship partner for DCR, as the Winchester monitor is the only regular staff person present in the Fells, and it is Winchester's Fire Department which gets called in emergencies.

The Trail Plan on paper seems well thought out and fair minded. Trail closure, etiquette enforcement, and improved signage and mapping are all commendable. Enforcing hiking only trail rules is critical, however, I disagree strongly with the mixed use concept for the

Orange trail. Multi-use sharing does not work, except on the broad fire roads. Suggesting pedestrians and bikers share the Orange Trail simply perpetuates the current bad chemistry between the two groups.

Finally, I urgently request that signs set up by DCR encouraging dog owners to pick up their dogs waste be replaced with pick up and take out signs. Too many owners are picking up and leaving full pet waste bags trail side for others to take out. Please, remove those signs and replace with signs saying "Please pick up and take out dog waste."

Thank you,

Ivey St John

Subject: comments on fells meeting

Dear Mr Jahnige,

I want to thank you for an excellent meeting.

I will comment on section 6.9 as a mountain biker and neighbor to the fells.

I agree with all the steps under the implementation of the dark hollow proposal. This is a far better use of the property. I think you made an excellent proposal and suggest the same theme through out the Fells

I agree with designating the Reservoir trail as multi use. The site lines are far enough and stakeholders can help maintain the area.

I agree with the rock circuit trail as hiker only

The sky line trail near Wrights tower does not offer long enough sight lines for multi use. Although there are a several other portions of this trail that do and could be acceptable multi use.

Adding the cross fells and crystal springs make sense. I would add that Lawrence woods is a blank slate that should be opened to biking with NEMBA stakeholders designing a sustainable trail through this area. Sight lines are good, there are very few hikers and is an under utilized portion of the Fells.

I agree with the March mud rule closing/ and no after hours biking or hiking.

Additional comments/ contrast to the proposal

I don't understand Virginia woods being off limits that would appear to block off a major portion of the fells. Can a sustainable work around trail be implemented. Just a single line through this area would all that would be needed

Adding a trail around spot pond would free up a loop for walkers. Lake Quaanapowitt in Wakefield is a great example of people enjoying a loop walk. Please add this to the agenda for future improvement. I think it would also bring more people to the Zoo and Dock area and increased foot traffic and good exposure for DCR.

I agree with yield triangle as a simple way for all to use appropriate behavior and make Friend of the Fells people realize it is not illegal to enjoy single track trails.

I think "pedestrian only Sunday" is a horrible idea, unenforceable, confusing and worse than the current no biker mentality. And for someone that works all week to have 50% of their available time withdraw from use is a bad idea.

Thank you again for your time.

Cc: friends@fells.org
Subject: Comment from a concerned user of the Fells

To whom it may concern:

I want to implore you not to extend the number of trails that allow biking in the Fells. I have been an avid trail runner, hiker, and walker in the Fells for 4 years now, averaging over 3 visits per week. I have a fair bit of experience in interacting with bikers and non-bikers within the park. I love the Fells so much that I bought my first house within walking distance of the Fells just 3 months ago.

My concern about extending the biking trails is based on the safety of all users of the Fells - hikers, runners and bikers. I have witnessed many instances where the mixed use of trails have ranged from inappropriate to dangerous behavior on the part of bikers. I have observed the tension that exists between hikers/trail runners and bikers on the small portion of trails that allow them to coexist currently. Examples of incidents range from being concerned for my safety when out of control bikers going at very high speeds pass within several feet of me, to commonly observing bikers using trails on which biking is prohibited and dangerous, to occasionally being forced to dive into the woods to avoid

particularly aggressive bikers, and finally to being verbally physically threatened by aggressive bikers on rare occasion.

From a safety perspective, the majority of the rougher trails in the Fells (Sky line, Reservoir, Cross Fells, Rock Circuit, etc) are not wide enough and visibility is not sufficient for hikers and trail runners to coexist with bikers, given the the velocity at which many mountain bikers routinely move on the hilly, rocky terrain. In addition, the quality of the Fells experience will be significantly diminished for many of us if bikers become as common as they are in many other parks that don't restrict biking.

Another concern is the common occurrence of people walking their dogs without leashes. Two points arise from this: 1) rangers without citation authority are incapable of preventing illegal use of the Fells, whether dogs that aren't on leashes or bikers that shouldn't be on trails or are downright dangerous in their use of the trails, and 2) dogs without leashes and high speed bikers on low visibility, steep, and curvy trails are a very unsafe combination, for both dogs and bikers.

No significant changes in Fells Reservation trail use should be made until the RMP process is completed.

Thank you for your time and consideration.

Sincerely,
Jason Messier

Subject: Bike Trails

As a biker myself, I am concerned about the Fells Trails being used for Biking.

I tend to stay out of the woods when riding, so I am biased here, but it is because of what I have seen.

I believe, by observation of being on the walking side and the riding side of the fence, that many bikers tend to be dangerous and have a lack of courtesy to walking people.

Then don't want to slow down when coming upon walking people, that's part of biking how fast and acrobatically can I be.

I am extremely cautious around people when I ride, though on occasion I literally have been used as a pylon by passing bikers when walking.

I hope I am wrong, but I believe there will be injuries as a result of any decision that opens the Fells up to Bikers.

And destruction, do you think bikers really care about the woods as a walking person does.

Subject: Middlesex Fells Reservation Trail Plan

Dear Fellstrail Committee,

> I just read your proposed trail plan for the Middlesex Fells and wish to make a few short comments about it:

> 1) I am very encouraged that you have produced this plan, I think overall it is excellent and look forward to the implementation of it.

> 2) I strongly support your proposal to improve the amount of single track available to mountain bikers by making other trails multi-use.

> 3) I strongly support your proposal to allow off leash dogs at sheep fold.

> 4) Simplifying the trail network by closing off a lot of the dead end trails, or 'spider network' trails will make navigating the trail network a lot easier.

> 5) Good maps provided by the DCR will be a significant improvement. The maps you posted showing the trail system on the trail plan section of the web site are excellent and far better than any of the maps I was able to find on the DCR web site up till this point:

>

<http://www.mass.gov/dcr/news/publicmeetings/materials/greenwaystrails/mapEmidfells.pdf>

>

> 6) When creating maps and improving signage I have found the system used at Lynn Woods where each trail intersection is numbered so if you need to find where you are you just look for the same number on the map to be excellent. Introducing a similar system in the Fells would significantly help navigation.

> 7) About parking, at the Marjam entrance to the Fells could the signage be improved to clearly indicate where parking is allowed as I understand that Marjam owns the parking area where I see quite a few Fells users commonly parking, sometimes Marjam has these cars removed, and I think the people in question simply do not know they should not be parking here.

> 8) I liked your diplomatic handling of FOF vs NEMBA issue. I am a strong mountain biking advocate but that does not mean I do not also love walking in the Fells and want to protect it for my children. I really hope that FOF will accept these changes and allow us (NEMBA) to work with them to improve the Fells for everyone. I am encouraged by your leadership on this trail plan, and am hopeful that with this continued leadership you will get all stakeholders working for the greater good.

>

> I am an active Fells users who is often found hiking with my kids, walking my dog, riding my bike in the Fells. I moved to Melrose specifically because it was close to the Fells. It is a fantastic natural resource.

>

> Please keep up this excellent work, it is great to see that the DCR is actively working to improve the Fells and I wish you the best of luck.

>

Subject: Fells Resource Management Plan

TO: DCR Commissioner Sullivan,

As frequent hikers in the Middlesex Fells and as Medford residents who live across the street from this beautiful resource, we feel strongly that there should be no consideration of changes in the Fells trails access policy until a Fells Resource Management Plan is completed as required by Mass General Law. This recreational area is already under resourced and allowing all of the trails to be used by bikers will only contribute to more deterioration and destruction of wild habitat. Due to already thin resources for patrolling, we continue to have problems with drinking and partying in the fells including bonfires. Please conduct a Fells Resource Management Plan so that we can determine the best way to preserve and protect this beautiful resource for everyone to enjoy. The Fells Trails System Plan must remain in draft form while a Fells Resource Management Plan (RMP) process is underway.

Subject: Fells Trails Plan

Dear DCR:

I wish to respectfully submit a request to keep the Middlesex Fells open to hikers/walkers and to limit the use by mountain bikers. I frequent the Middlesex Fells and really love walking around it. Please keep it a safe and wonderful place for walkers and hikers and for families with small children. Often the peacefulness and enjoyment of the trails is reduced by mountain bikers who come up fast behind people on trails which are clearly marked for hiking only. Or mountain bikers go into areas of the Fells clearly marked as off-limits.

Additionally, there is so little protected land near Boston which can sustain a variety of animal life except for places like the Middlesex Fells. These small protected areas are the only space the animals have without being forced out onto the roads and the only place local children can be exposed to the wonders of nature. Small groups of hikers do not harm the trails or disturb animal life but large groups of mountain bikers tearing up the trails and being loud do disturb every life form. Please keep the Fells a beautiful sanctuary for the nature lovers in our communities.

Thank you for your consideration.

Subject: Children's Nature Group has concerns about Fells Plan

I'm the founder of a group called Bay State Kids Outdoors. For the past year, we've taken groups of children and parents into the woods and fields of Massachusetts. We've run over 50 trips and logged over 1000 hours of Kid/Nature time. Visit our website www.bsko.org to see our mission and activities.

This summer I stopped taking my group to Sheepfold at the Fells. We had a really stressfull hike to the tower with loose dogs and careless bike riders. We didn't want to expose kids to that again.

So we tried Long Pond in September. It was a nice hike. But honestly, I told two of my regular families they might want to skip the hike as their kids don't like loose dogs. Sure enough none of the or so 7 dog we saw were on leash. And as we stood near the overlook of the pond, two off leash yellow labs came bounding down the trail into the water. Thank God no kids we knocked in.

This isn't theoretical. The Fells is a gem. Truly. But the Fells Management needs to decide if it wants kids and families to visit. If the state continues to wink at reckless dog ownership and free for all bikers we'll stop going. We have cars and can go where we please. My sympathy rests with those who can't drive to NH and who count on the Fells for easy access to nature.

Sincerely,

Brian McBride

Subject: keep bikes off of Fells trails

To Whom It May Concern --

It is imperative to our human and natural community that the Fells trails remain clear of bikes. Besides the fact that the Fells has been a sanctuary for so many of us who love to walk there, it is also home to so many species of plants and animals. Introducing bikes onto those trails is destroying an environment, a sanctuary, and a home. There are plenty of other places for people to bike. The Fells is a unique and wonderful part of our region. Please, please, please -- consider the long and short-term ramifications of this decision. It is huge.

Subject: Mountain bikes in Fells

Any change in public use at DCR reservations should take into consideration the core mission of the Agency; preserve and protect the Natural Resources. In other words, conservation comes before recreation.

As a former board member of FOF(1990), old friend of Mary Bietel, Jim Comeau, Rene Moran, and Chip Norton I am familiar with the pressure of user groups for increased access to Agency properties.

People who come to the Fells for quiet enjoyment are not the most focal user group. Their enjoyment is compromised by biking in the Fells.

I suggest that a Natural Resource Management Plan should be done BEFORE increasing or even permitting to increase threats to the habitat and other users.

Thank you.

Subject: Middlesex Fells Trail Use

To the DCR:

I am writing again to the DCR to express grave concern for your plan to convert a state reservation- for which I pay top tax dollars as a Massachusetts citizen - to a mountain biking park. What can possibly be the reasoning?

I cannot tell you how many times I've almost been run over by a mountain biker bent on cycling through what used to be a quiet nature reserve for children and families, school groups and seniors. As a 35 - year resident of Medford, an avid bird-watcher, naturalist, parent, and teacher, I understand multiple use spaces, and I can tell you that mountain-biking does not belong in an urban reservation. The Middlesex Fells is desperately needed by its local citizens, who range in age from infants in backpacks and strollers, to older visitors who cannot always hear the cyclists approaching, let alone dodge them.

I appeal to the DCR to pay attention to the lobby-less residents of Medford and environs, who have safely visited the Fells for generations, to observe the landscape and wildlife, undisturbed by encroaching mountain bikers, who have a powerful, well-funded lobby. Do not give away this urban jewel.

No significant changes in Fells Reservation trail use should be made until the RMP process is completed.

Respectfully,

Leslie F. Kramer

Subject: Mountain bike use for the fells

To whom it may concern,

I was very dismayed to hear that some organization wants to turn the Fells into a mountain bike recreation area. My husband and I have walked through the Fells on many occasions and we have enjoyed the relative quiet that we find there, away from the loud city. It really is pleasant, at all times of the year. I can't imagine, what it would be like to have mountain bikes whooshing by us during our restful interlude.

Is there any way, that you could have a separate area for mountain bikers and another one just for walkers? It seems unfair to combine the two, since the needs of both, are so different. A child could get hurt....and it would certainly curtail our use in the future.

Please consider the alternatives before you take this drastic measure.

Thank you for your time.

Subject: Re: the Fells Trails System Plan

I certainly hope that the proposal for the Fells Trails System Plan (as described below) is reversible. Bikes are already found on trails where they're not allowed, and they are erosive on the trails and often a rude danger to foot-goers. This would certainly be a revolting development.

BG

[From Friends of the Middlesex Fells Communication]
"DCR planning to convert the Fells Reservation into a mountain bike park.
Please help stop this plan.
Don't let the nature of the Fells be lost!"

DCR Fells Trails Plan re-frames the Fells Forest Reservation as an "urban recreation park"

On September 21, DCR released a Fells Trails Plan with the agenda of beginning to convert Fells Reservation hiking trails to bike use. This would change the Reservation forever.

Natural features will be destroyed throughout the Fells
The biodiversity of birds, wildlife and plants will be threatened
Visitors' ability to safely and quietly enjoy nature will be jeopardized

DCR proposes conversion of these Fells hiking trails to mountain bike use:
Reservoir Trail - Dark Hollow Pond Trail - 'Sections' of Cross Fells Trail and
Crystal Springs Trail – And conversion of nearly all the rest of hiking trails to bike use in the
near future

DCR Proposes creating new mountain bike trails through undisturbed woodlands:
Create three mountain bike trails from Bear Hill to Sheepfold

DCR proposes no effective enforcement of any of Fells rules and regulations:
No citations and levying fines for infractions of Fells regulations
No teaming up with the State Police who are willing and able to assist DCR Rangers enforce
regulations to protect natural resources and safety of visitors
Just 'two seasonal rangers' with zero enforcement power can't police 2500 acres
DCR presents no means to enforce protection of Priority Natural Communities, Rare and
Endangered Species & Habitats, water quality, Vernal Pools, from bike riders riding
wherever they choose; DCR proposes no enforcement to preclude the new bike riding
influxes from creating the "dense trail networks (which) can disrupt breeding birds, create
lethal barriers to amphibian movement, and compact forest soils, among other impacts to
general biodiversity." [Lynn Harper Habitat Protection Specialist Massachusetts Natural
Heritage & Endangered Species Program; Fells Trails Plan Appendix F]"

Dear Madam or Sir:

Please do not expand the number of trails that mountain bikers are allowed to use. The disturbance to wildlife and plantlife would be enormous and extremely detrimental.

At the very least, a Fells Resource Management Plan must be undertaken and approved before any small or drastic changes are allowed to take place. The Resource Protection process is an important one. Please let it happen. And please let people know that habitat and open space is being threatened so that they are given an opportunity to voice their concerns.

Very truly yours,

MaryAnna Foskett
Arlington, MA 02476-8005

Subject: Fells Reservation proposed changes to Trails Plan

To whom it may concern:

Why is it that we have to turn every last piece of natural land into a human playground? Who advocates for the woodland creatures, and the natural flora and fauna, who call the last few dwindling urban oases of forest and grassland home? I am amazed that the DCR is considering turning several of the walking trails in the Fells Reservation into biking trails. Do they honestly believe that bikers grinding their way through these woodland areas will have no adverse impact on the area? Further, why should the wants and desires of those who want to race bikes through the woods take precedence over the desires of countless other folks who value these same trails for the quiet solitude of walking in a forested area?

The Fells Reservation is a jewel in this heavily congested region of bedroom communities. We all have a duty to make sure that the Fells Reservation and its ecosystems are protected, and at the very least, careful study of the impact of a proposed use such as allowing mountain bikes to traverse the trails should be conducted...publicly. There should also be an opportunity for those of us who value a lower and quieter impact use of the trails to be heard.

I am writing to urge the DCR to halt implementation of the proposed Fells Trails System Plan in place until there has been an adequate study of the impact of allowing mountain bikes to use the trails and until there has been an opportunity for all users of the Reservation to express their opinions and concerns.

Thank you for hearing my comments.

Subject: Please consider biodiversity in the Fells

To whom it may concern,

Please consider the tenuous nature of the Middlesex Fells as a preserve for biodiversity. I am a biology graduate student at the University of Massachusetts Boston and have conducted research on the distribution of amphibians in the Fells. I believe that the Fells is a great asset to the people of the Boston area and should be protected for future generations, therefore strict enforcement of the park rules is critical in this heavily used reservation. An increase in trails and bike traffic in the reservation will adversely affect wildlife by increasing noise; trail erosion and further fragmenting natural habitats. Please - no significant changes in Fells Reservation trail use should be made until the RMP process is completed.

Thank you, Matthew Gage

Subject: Fells No Bikes

Dear Park Planners,
As a Melrose resident who LOVES walking in the Fell area of Melrose, Stoneham, and Winchester, I am opposed to the proposed plan to extend the use of bicycles.

A recent Boston Globe article painted those of us who LOVE the fells for walking are somehow out of touch with reality. It implied that we were snobs. It implied that we wanted the Fells for ourselves. But "ourselves" is all of us. It is a public park, open to all.

We love beauty. We love preserving beauty.
We love nature. We love preserving nature.

That is your job as well.

Preserve beauty. Preserve nature.
Say no to extended bike use.

Subject: Mountain Bike Trails

As a non-paid caretaker of Wrights Pond Park in the Fells for the last 30 years, I am appalled by the increase of abuses of hiking/walking trails by ignorant mountain bikers. They careen over rocks, muddy trails and gouge non-trails upsetting the environment of the Fells. I have enjoyed the Fells over 60 years. My Mom was a girl scout leader and we hiked the Sheepfold where soapbox derbies were held in the 50's. I've cross-countried skied on the trails off South Border Road. I've skated at Long Pond and Wrights Pond where we have fishing in the winter. We stocked the Pond with bass years ago. You'd think it was NH, not Medford.

While hiking the trails in the Fells, I've almost been knocked over by mountain bikers and have heard complaints from Babe In the Woods, a hiking group for young children. Most mountain bikers stay on assigned trails. They are enjoying nature too, not careening

through like being in the Indy 500! These younger riders tend to be reckless. Everyone wants to enjoy the peacefulness of the Fells. Birders, fishermen, hikers, etc. Can't we all enjoy nature together? I met a gentleman from Charlestown who rode over to the Fells. He enjoys mountain biking and was disappointed by some of the behavior of fellow mountain bikers. Please do not enlarge more trails for mountain bikers. There's no reason they should get preferential treatment over true nature lovers like myself et al. Thanks for your consideration.

To Whom It May Concern:

It has come to my attention that you are considering converting the Middlesex Fells Reservation into a wide-scale recreational bike path. I would urge you to not pursue this course of action. My husband and I regularly hike with our dog in the reservations. We keep our dog on a leash and enjoy being able to walk without having to worry about bikers. I understand that hikers and bikers need to share the Middlesex Fells Reservation, so I would encourage you to keep the status quo, which is to have both biking and hiking paths. Having the Middlesex Fells Reservation so close is one of the nicest parts about living in West Medford and I would hate to lose this. Thank you for your consideration.

Subject: comments on draft plan

My wife and I have been hiking, mountain biking and cross country skiing in the Fells for 20 years.

We are members of Friends of the Fells, NEMBA, and the AMC.

Our overall comment on the draft plan is that it is excellent. It is a common sense and well reasoned plan that fairly balances the needs of a variety of uses and users. Good job!

A few specific items we would like to see considered in the final plan are:

- Additional Enforcement: Specifically of the dogs on leash rule and mountain bikes on no bike trails.

(My wife and I have had an increasing number of unpleasant experiences with dogs off leash, primarily when hiking but also when biking)

(You'll also get greater buy in from hikers if they believe they'll be enforcement on the no biking trails)

- Greater Consideration of Cross Country Skier Needs

The samples taken of Fells usage were not done during snow periods. It appears that the cross country skiing usage is under estimated.

We see many, many skiers on suitable skiing days.

The major frustration of cross country skiers is that they break snow and lay down tracks after a storm, then other users trample all over the tracks making skiing difficult on subsequent days.

We have two recommendations: designate a small number of trails as "skiing only" (when there is snow on the ground); and post "winter trail etiquette" signage on fire roads/wide trails recommending skiers stay to the sides while hikers/dogs/snowshoers stay in the center and off ski tracks – something like shown below:

|| Snow Etiquette ||

|| walk/snowshoe ||

|| in center ||

||keep off ski tracks ||

Sincerely,

John & Marie Dacey

Subject: Site Walks and illegal trails

The Site Walks were only attended by 27 people. So few people came that it was an ineffective way to gather public input, or transmit information about the proposed plans to the general public.

During the site walk it was proposed that a new trail be created using illegal trails, in order to close spider trails. This was in the area north of the Sheepfold adjacent to Rt. 28 between gates 24 and 25. The effect of a trail through this narrow area would be to eliminate all wildlife habitat. The distance between the trail and the fire road would only be about 75 feet. With 50 foot disturbance zones on either side of the trail and roads, there wouldn't be any area left where wildlife would not be disturbed. The same is also true of the proposed new trail to be created out of an illegal trail going by Bear Hill.

Creating new trails out of illegal trails to close spider trails is the wrong approach:

- Hundreds of signs & posts needed, not cost-effective with tax-payer dollars
- Manpower of DCR and volunteers pulled away from maintenance of current trails
- Rewards bad behavior of those who created the illegal trails, encourages making more illegal trails
- Provides access for people to keep spider trails open
- Requires constant enforcement
- Creates new trails for a single purpose with no input from constituents whether these trails make sense for the Fells as a whole
- Fragments the forest, causing environmental damage through introduction of invasive plants, and elimination of wildlife habitat

Best time and cost effective way to close spider trails is to close off areas entirely:

- Fewer signs & posts, less taxpayer money expended
- Scarce manpower not diverted from maintenance of current trails
- Closes access to all illegal trails
- Sends right message, all illegal trails will be closed
- Less effort to enforce
- New trails should only be created from consensus of all user groups that they are desirable for multiple reasons, fulfilling multiple needs, and are environmentally sound
- New trails shouldn't be redundant with existing trails, and would need to be carefully planned to minimize environmental effects

Subject: mountain bike plan

Please DO NOT expand the use of mountain bikes in the Fells. They are disruptive enough as it is. If the use trails are expanded for mountain bikes we will have huge numbers of mountain bikers as it will become a prime place for mountain biking disturbing the animals that live there and the hikers. The parking lots will become much too crowded and the trail erosion will not be repaired. It will become impossible to enforce.

Thank you for your consideration,

Subject: comments on trail plan at Middlesex Fells

Please consider the following comments:

-Please open the Reservoir Trail to bikers (and hikers!). It is so beautiful and wide it seems both bikers and hikers could coexist well there. It is too beautiful for both to resist (and they don't). Other reservoirs (like Fresh Pond in Cambridge) have much higher use close to their shores and I believe Cambridge has the best water quality in the state. I can't believe with the advances in water treatment technology that biking and hiking would impact water quality there. (It may make sense to keep dogs away though for obvious reasons).

-I also endorse the Dark Hollow expansion of biking trails and reduction of so called "spider trails"

-Also I endorse only banning bikes to the spring mud season vs. Jan and Feb. Few people like to bike in the mud anyway.

Subject: Proposed conversion of Fells hiking rails

To whom it may concern:

We strongly oppose the proposed DCR planned changes in use of the Fells Trails until the Resource Management Plan process is completed. My wife and I are frequent users of the hiking trails as hikers and runners and believe the conversion of these trails to allow additional biking would not only cause serious ecological degradation to the wildlife and fauna in the environment but also negatively impact our enjoyment of this natural resource. As pedestrians in the Fells Forest, the increased proliferation of additional mountain bike traffic will disturb the peacefulness and safety of our visits. We are also concerned that DCR is not in support of more effective enforcement of current Fells rules now in effect such as for the leash requirement for dogs - more can and should be done.

Subject: Strong support for Fells Draft plan

I express strong support for your draft fells plan. As a frequent fells user, where I run and walk with my three small children, I was very concerned that the vehemense of the certain user groups would lead to a long list of exclusionary rules and armed police presense at each entrance to enforce the rules. I have never had a problem with other fells users be they on bicycles or four feet. I think that others should learn tolerance and respect and not seek to ban people they find mildly offensive. Your deft plan seems to support this viewpoint.

Subject: Biking trail plans!

Greetings,

I'm a member of the Friend of the Fells and hike on the trails regularly. I've had several near-collisions with people on bikes who are on paths not meant for bikes! They are often riding on the small, narrow trails close to the ponds and come down hills at break-neck speeds. Several times I've reminded them that they're riding on paths not meant for bikes and have been verbally rebuked for speaking to them. I've had several men who have argued with me the instant I open my mouth to say "You know this isn't a bike path. Your tires are eroding the trail". They instantly tell me that it's just as much their right to ride on the paths as for me to hike.

I strongly urge the enforcement of bikes on designated paths - ONLY!

Thank you,
Virginia LaCrow

Subject: Fells trail plan

To whom it may concern,

I am the lead organizer of a hiking group with over 700 members named "Hike the Medford fells". I lead large group hikes through all of the Middlesex fells trails on a weekly basis. I am writing to express my concern over the changes proposed to the trail system with regards to bicycle use. Many of my members have come to me with their concerns, and I told them that I would express them to you. The Middlesex fells reservation is a fragile ecosystem, like many wilderness preserves. There is no other reservation of this type and size in the Boston area (the blue hills are very different). So it is important that we preserve this natural resource.

Currently there are a large number of biking trails through the fells. They are well established and have been there for a long time. They are relatively easy to ride on, and relatively safe for a biker to traverse. To open up the established hiking trails to bikers would not only cause a much greater impact on those picturesque trails, but would also put many more bikers on trails that are far too dangerous for bike riding. I have hiked the trails that you are considering converting on a regular basis for the last 10 years. There are many stretches that I would consider somewhat suicidal to attempt on bicycle, but which an avid mountain biker would attempt anyway if the trail were open for biking. If you open those trails to biking, you are essentially telling people that it is a safe recreation for them to do on those trails. Someone is going to get hurt. It might be a biker, or it might be a hiker who can't get out of the way in time for a biker who is losing control. But you should consider the possibility that you could be opening yourselves to lawsuit. My recommendation would be for some of your members to actually attempt these trails by bike before voting to make the conversion. I would also recommend waiting until the fells Resource Management Plan has completed its study before making any changes. And lastly, if you are actually considering cutting down trees to make additional trails, I and my fellow hikers would strongly protest. Thank you for your consideration.

Sincerely,

David Barnes

Subject: Mountain Biking in Fells

Good Morning-

I am writing to request that the DCR give due consideration to expanding mountain biking opportunities in the Fells. I have been mountain biking for 20 years and I am now sharing my love of the sport with my three children. We feel very fortunate that the Fells is only 10 minutes from our house. As my children are learning to love mountain biking they are also learning to love and respect the natural beauty of parks like the Fells. In my experience mountain bikers are great stewards of our natural resources. I believe that expanding

riding opportunities in the Boston metro area will not only benefit the mountain biking community but also benefit conservation efforts across New England, as mountain bikers will have a greater opportunity to share not only their love of mountain biking but their passion for protecting the environment.

Thank you for your time and attention.

Sincerely,

Greg J. Gohr

Subject: Middlesex Fells Trail System Plan

Dear DCR,

I've read through the Middlesex Fells Trail System Plan and feel obligated to submit comments on the plan as I use the Fells on a weekly basis. Mostly as a mountain biker, but also as a hiker, and as soon as the little one can keep pace on her own I'll be experiencing the trails from a completely different prospective all over again. I have a great love for the outdoors and I've been taught to respect and protect our natural resources and to fight for what I believe is right.

I think this plan is well thought out and intended to keep the many user groups of the Fells satisfied while still being able to manage the trail system appropriately. As the document states in its opening words that this is a working document and a component of a future Resource Management Plan. That statement is key, as I feel this is a great first step in providing a sustainable management plan for this park, but there's still a lot of work left to do.

I strongly agree with the key points made to reduce the overall trail inventory and to improve and close trails in cooperation with stewardship partners. I believe it's the quality of the trail and how they're connected and marked more so than the quantity of trails. It's never any fun when you get lost on a dead end trail. If given the opportunity I think you'd see a large number of volunteers willing to help with this, especially in the mountain biking community. I know I'd be willing to volunteer and I think this also lends itself to helping protect the park's sensitive resources.

Having a well thought out multiuse trail system that flows with varying degrees of distance and difficulty that is well marked would be ideal. I feel this not only as a mountain biker, but as a hiker as well. I don't agree with "hiking only" trails, because you're giving one user

group access to a trail system and not the other. I feel that the park should only designate "hiker only" trails only if you designate "mountain bike only" trails as well. That would make sense if you're trying to improve the overall experience for one particular user group. My personal feeling is that the mountain bike community has been the most vocal in how they feel the park should be utilized and they've made that clear on the displayed chart on page 20. Mountain bikers have made it clear that they care about the park and its best interest and if they're willing to put in the effort to maintain it then they should also have designated trails. Don't get me wrong, I'm not trying to advocate on behalf of making mountain bike only trails (though it would be nice) in the Fells, I'm only trying to look at it through a different prospective. I feel that opening the orange trail is a great first step, but opening up some additional trails so that they're multiuse trails would be ideal for a mountain biker. I think that a quality experience can be gained by all user groups through mutual respect and educating the trail users on proper trail etiquette.

I'd like to thank you for the opportunity to make these comments and for all of the hard work that's gone into this so far.

Sincerely,

Marco Gomes

Subject: Dear DCR,

I am writing to express my thoughts / ideas pertaining to the Fells.

I have been to the meetings and am all for cooperation and amicable resolution for all parties involved.

I'm a Malden resident and use Fells for hiking, snowshoeing, mountain biking. The plans to close and or reroute many trails for various reasons are very much needed. It's also good to see expanded use for mountain bikes specifically. However I am still in awe that the park is not opening all trails for all uses.

As the existing proposal does expand mountain biking, it still will keep everyone in the same areas. People on top of people. The last thing I want is to bother or ruin anyone else's experience.

I have proposed this in the past. The Fells is huge, it would be logical to have a loop designed and implemented that goes around the outer edges of the whole Fells area and medium sized one also for all uses. This would absolutely alleviate overcrowding / everyone in the same areas on the same trails.

Biking is part of my life. The existing bike loop is a 40 minute loop for me, I enjoy 3-5 hour rides so you can see where I am going to be passing the same people many times in one day. If I was hiking on that day I would be annoyed too but understand that I am riding the only legal loop and am not there to be in anyone's way. Let's design and make the outer loops to spread out the volumes of people.

There are groups that want no mountain biking at all.
Discrimination, poor attitudes, YES! I don't have time for this negativity.
I can tell you, I would love to see everyone out in nature for every and any reason possible.

The Fells is an Awesome place and so close to Boston. It's a godsend to have this resource.
I simply would like to enjoy along with everyone else.

sincerely

Subject: Fells Reservation

October 19, 2010

To whom it may concern,

As a long-time resident of the local community of Arlington and Fellsway lover I am writing to express my alarm and opposition to the recent plan to develop the parkland for more rigorous bike usage. Over the course of twenty years I have walked or cross-country skied the wooded trails innumerable times and have taken delight in each and every experience. What draws me to the woods each and every time, is the opportunity for solitary reverie with a nature as little disturbed as possible. In my view, there is no need nor gain achieved by the physical alteration in the landscape especially if undertaken to accomodate/expand use by such a select group. Nature's gift, its draw is its unaltered state, enjoyed in so many varying ways by so many varying individuals. Modification of the land on the scale described risks too much. When do we start to hear the land's needs and honor them?

Many times I've hiked the trails to be disturbed by a cyclist tearing at full speed down a trail specifically denied bike use. Over the years I've noted the erosion of many areas and wondered to myself how much has been due to reckless use of space? Why not use the available monies for remedial work and programming that fosters responsible use of this local treasure.

At the very least please make sure that no significant changes in Fells Reservation trail use be made until the RMP process is completed.

a concerned user,

Joanne Rothstein, Lic. Ac.

Subject: Comments on Fells Draft Plan

After reading the proposed plan I have the following general (first) and specific (following) comments:

As a general statement, I am firmly in support of the fells being entirely shared use. Much of the conflict in the park stems from feelings of entitlement on the the part of different user groups. A blanket shared-use policy would be a powerful statement that such entitlement is not productive. Further, given the limited resources available to DCR, diverting resources from maintenance to enforcement of restricted-access policies for specific user groups seems like a waste.

Given the strong sentiment toward modifying the trail layouts, intersections, etc. in the draft plan I would be in favor of trail designs that shape use (making certain trails more or less attractive to different user groups) as opposed to explicit access restrictions.

Specifically I have the following comments (divided into AGREE and DISAGREE):

AGREE....

6.1: Reduce the Trail Inventory: I support the closure of spider trails and dead ends, and minimizing intersections. This would improve the user experience. I do not believe that there should be fewer trail miles, however. In my opinion the fells trails suffer from an overuse problem that would be mitigated by spreading traffic over more miles of high-quality trail. Any closed "junk" miles should be replaced with quality trails that will help to spread users.

6.2: Formalize partnerships with stakeholders like NEMBA, AMC: 100% Support. These organizations have done amazing things at other DCR parks. They should have a formal role at the fells

6.4: Winter Closure becomes March 1-March 31: I support the new closure date. From my experience in the park this better aligns with the reality of the trail conditions. Given that MTB and Hiking use are viewed as equally impactful in the plan I don't understand why the policy applies only to Bikes. Perhaps a policy of closing singletrack trails to all users during this time but leaving fire roads open year-round would be superior?

6.9: Orange (Reservoir) Trail made shared-use: 100% support.

6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use: 100% support. This case is a clear parallel to a similar case in Santa Cruz where failure to take action to redevelop a similar illicitly-used area (drug use) in the name of conservation resulted in the area becoming so run-down that the police were even afraid to enter. The

DCR plan that both closes spider trails and injects wholesome users is an excellent one that should be implemented as soon as possible.

6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use: 100% support. Contrary to the statement of the plan, there are many places in the fells that could potentially provide opportunities for "Advanced" Mountain Biking. In fact, a fully shared-use fells would present some of the most challenging technical Singletrack in the greater Boston area. Closing many trails to the second largest user group squanders a rare and valuable recreational resource. Cross fells, in particular, presents many advanced opportunities for cyclists.

6.9: Evaluate other trails for shared-use through RMP process: 100% agree. shared-use disperses users and should slow down mountain bikers (because more advanced cyclists will often opt for the more challenging trails as opposed to using easy trails like a racetrack). More shared-use trails mean fewer resources can be spent on enforcement and more on maintenance.

DISAGREE...

6.8: Designate Skyline (White) as hiker only: STRONGLY Disagree. see previous statements about shared-use.

6.9: Designate Virginia Woods as pedestrian only: STRONGLY Disagree. see previous statements about shared-use. This also makes a complete park loop by bike nearly impossible and forces abutters who bike to ride on busy roads to access park.

6.9: Evaluating separate uses by times or days through the RMP process: STRONGLY Disagree. Access times are unenforceable and may unfairly exclude some users from having any park access at all depending on their work or other responsibilities.

Best,
Keith Berkoben

Subject: Trails for all.

Hi,

I've attended the meetings about the fells trail system realignment. All I ask is equal access to trails at the Fells like any other state park. Any reasonable request to stay off of a trail for preservation, restoration or otherwise is fine, as long as it is for everyone. There shouldn't be any special treatment for any group. That opens the door for more animosity. The policies currently in effect at the Fells have created the negative atmosphere between

cyclists and hikers. Mostly because the hikers have greater freedoms than other user groups in the Fells. The inequity fuels this animosity and creates a perceived class system within the Families of users. Whereas the former governing body of the Fells created the rules under which the current environment was fostered it is up to you now to end it. Get it right. Equal access, equal restriction, that is all we want. Thanks for your hard work. I know you will do a great job.

Matt Pickett

Pickett Design

Cambridge, MA 02139

Dear Paul Jahnige & team DCR,

First of all, I would like to thank you for putting together the Draft Trail Plan for the Fells. You've done a great job and released a document of the highest qualities (I especially love the maps).

Please find my comments to the content of the Draft Plan below.

Best,

Antonín Koukolík

COMMENTS TO SPECIFIC PARTS OF THE PLAN (BOTH SUPPORTING AND OPPOSING)

PAGE 41 "DEVELOP AND DISTRIBUTE NEW TRAIL MAPS FOR THE MIDDLESEX FELLS"

I support that! A big, beautiful map, which will contain all information, will help users to find their ways through the Fells, as well as keep in their minds that there are other users, too.

PAGE 41 "DEVELOP AND DISTRIBUTE A MOUNTAIN BIKING MAP."

I oppose. Develop one good map with all information instead of a few simplified ones! By developing separate maps, you give one group sense of being something special and make them forget about other users.

If you still consider creating use-specific maps, then such map should be based on the general map and contain highlighted use-specific trails and more use-specific information.

You could create a winter map, with suggestions for good cross-country skiing and snowshoeing. I would put that one online only as there might be fewer winter-users.

Creating a use-specific map might result in an epic fail. You have an example of a fail here:

<http://www.bikemaps.com/regmaps.htm> (Why is this map a fail? Because it leaves out a lot of streets, which makes impossible to navigate with this map when you get lost. And why do you have a map? So that you don't get lost and can find out precisely where you are. But that's impossible when some information is missing.)

PAGE 42 "IMPROVE SIGNAGE AND TRAIL MARKING WITHIN THE MIDDLESEX FELLS TRAIL SYSTEM."

I believe the signage is one of the most important parts of the user experience, especially for users who visit the Fells less frequently.

I don't agree with the design of the trailhead signs. The trailhead signs should contain the WHOLE Fells map with all the detail. Especially for long-distance activities such as mountain biking, the whole map is appropriate. "You are here" marking should be included.

Information about legal use for all trails should be included in each sign! Each sign should be saying which trails are legal for hiking, mountain biking and other uses. Each sign should talk about dog policy and mention dog friendly areas. Basically each trailhead sign (1 in each parking designated area) should have ALL the important details about the Fells. That would require a bigger sign with more details and more information. That's the only way how to educate users such as local dog walkers or mountain bikers who don't know about this process or changes in the Fells trails and policies.

As well, with the destination, the mileage information can be tricky, because 1 mile of Skyline trail takes a different amount of time than 1 mile of fire road. More sophisticated places use average walking time, which is what I would recommend using together with the mileage.

PAGE -73 (APPENDIX I) – “IN THE FELLS, WE RECOMMEND THAT OFFICIAL TRAILS (OTHER THAN THOSE SPECIFICALLY DESIGNATED ROUTES ABOVE) SHOULD BE BLAZED IN DARK BLUE FOR MULTI-USE TRAILS AND WHITE FOR HIKING ONLY TRAILS.”

I strongly oppose the suggestion that any hiking only trails other than Rock Circuit and Skyline Trail will be marked with white color. The reason for my opposition is that the exclusiveness of the white color to the two main hiking loops in the Fells helps orientation and should be maintained. As soon as you see a white reassurance blaze, you know you are on the Skyline Trail or on the Rock Circuit Trail (and assuming you know whether you are on the west or east of 93, you know on which one). If you use white blazes anywhere else, this unique feature making orientation easy will be lost.

PAGE 74 (APPENDIX I) – “DIRECTIONAL CHANGE INDICATORS”

I oppose the use of “caution” blazes. From my point of view, it is redundant and confusing, especially if a similar sign should mean a change of direction. They might cause “signage pollution” (e.g. on the Skyline trail, if you wanted to mark all tougher spots, you might end up marking the whole loop with “caution” blazes). A cautious user doesn't need such blazes. Instead, I would talk about the general difficulty of the trail on the trailhead sign.

I oppose the shape of the directional blazes (example given “turn right”). They are confusing and their shape does not allow for pointing in the direction where the trail goes (a 90 degree turn against a slight 30 degree turn). I propose keeping the current “L” shaped directional blazes, which are more clear in getting the message across (“make a turn this way!”). As well the best practice on “avoid arrows” is unclear to me, I have the best experience with trail blazes in the shape of arrows (when used wisely, of course).

One thing is not stressed in the document, which I find it very important is the consistency of marking. When two or more trails overlap, the all the blazes marking those trails should be always together. The example – if there is an overlap of the white, orange and green trails, there should be always a white, orange and green blaze together. If one of them is missing, it creates confusion because the user will think one of the trails separated without him noticing. Very important.

PAGE 42 – “CONSULT WITH MWRA AND TOWN OF WINCHESTER ON TRAIL USE DESIGNATIONS AND POLICES THAT AFFECT WATER SUPPLY LANDS.”

I strongly support that. The trails encompassing the reservoirs are one of the best mountain biking trails in the Fells, especially because of a good flow, nice terrain and less interference with other trails. Mountain biking does not interfere with the water supply such as off-leash dog walking does, so there is less reasons for keeping the mountain bikers

out. Those trails in the Town of Winchester lands even have potential for new multi-use loop around the reservoirs.

PAGE 42 – “POST AND ENFORCE A SEASONAL CLOSURE FOR MOUNTAIN BIKING AT THE FELLS DURING “MUD SEASON” (MARCH 1 TO MARCH 31)”

I strongly support this provision. There is no reason to keep the Fells closed to bikers when the ground is frozen in winter. The leafless Fells offer a whole new experience and atmosphere, who has never been in the Fells in winter will never know.

PAGE 42 – “EDUCATE DOG OWNERS ABOUT THE POTENTIAL IMPACT OF DOG WASTE ON WATER SUPPLIES, AND ENFORCE “CARRY-IN, CARRY-OUT” POLICY.”

I strongly support that. Recently, a lot of dog walkers was leaving their bagged dog feces in the Fells. That is even worse than not picking after their dogs at all! I’m angry when I run into a pile of dog feces, but I’m even more when I see bags of dog feces, which can not decompose, lying all around.

PAGE 45 – “MAINTAIN, PROMOTE, AND ENFORCE “HIKING ONLY” TRAILS WITHIN THE MIDDLESEX FELLS TRAIL SYSTEM, INCLUDING, AS A PRIORITY, THE SKYLINE AND ROCK CIRCUIT TRAILS.

I strongly oppose this provision. In my opinion, every trail should be shared use in the end, and tolerance and respect should be the way to achieve zero conflict on all multi-use trails. The Skyline trails is a very challenging single track. That’s why it is highly valued by a small, very specific group of advanced mountain bikers. I suggest considering the Skyline trail for shared use. Because of the vastly rocky terrain, there would be limited impact on the trail by allowing mountain bikers in. Because it’s tough to ride and there won’t be many bikers there, the hiking experience wouldn’t be impacted either. The Skyline trail could be initially put into shared-use for weekdays and one weekend day only (e.g. Mon-Sat) and if there is no conflict, it could be introduced as a full shared-use trail later on.

PAGE 45 – “DESIGNATE VIRGINIA WOOD AS A “PEDESTRIAN ONLY” SECTION OF THE FELLS.”

I strongly oppose this provision for the following reason: If you designate Virginia Woods pedestrian only, you limit the access in the north-eastern part of the Fells for all users. Doing a large loop around the whole Fells would become impossible for non-pedestrians. Non-pedestrians who enter the Fells through Virginia Woods will have to travel further. There should be at least one multi-use trail going through the Virginia Woods in the north-south direction. The rest can be pedestrian only.

PAGE 46 – “EVALUATE, THROUGH THE RMP PROCESS, OPTIONS FOR SEPARATING USES BY TIMES OR DAYS SUCH AS A TRIAL “PEDESTRIAN ONLY SUNDAY’S” POLICY.”

I strongly oppose this provision, because it would create a lot of discrimination. Imagine you are a user who has only one day in a week free for going to the Fells due to your work/family assignments. And that day, your favorite activity is not permitted in the Fells, because it’s “some other activity only day”. As I mentioned above, tolerance, respect and sharing should be the way to zero conflict, not selective access (you would teach your kids to share candies, too, and not tell them that Johnny gets candies on Monday and Billy gets them on Tuesday).

OTHER SPECIFIC PROVISIONS I SUPPORT:

- PAGE 40 “CLOSE TRAILS AND REDUCE THE NUMBER AND MILES OF TRAILS WITHIN THE TRAIL SYSTEM.”

- PAGE 43 – “EVALUATE, THROUGH THE RMP PROCESS, THE CREATION OF A NEW “ALL PERSONS TRAIL” CONNECTING FLYNN RINK PARKING AREA TO THE TRAIL NETWORK NEAR QUARTER MILE POND.”
 - PAGE 44 – “CREATE A MULTI-USER “TRAIL AMBASSADOR” OR “TRAIL WATCH” PROGRAM.”
 - PAGE 45 – “WORK WITH MOUNTAIN BIKING STAKEHOLDERS”
 - PAGE 45 – “IMPLEMENT THE DARK HOLLOW TRAIL PROPOSAL.”
 - PAGE 45 – “DESIGNATE THE RESERVOIR (ORANGE) TRAIL AS A MULTI-USE TRAIL.”
 - PAGE 45 – “EVALUATE, THROUGH THE RMP PROCESS, DESIGNATING ALL OR SOME PORTIONS OF THE CROSS FELS AND CRYSTAL SPRINGS TRAILS AS A MULTI-USE TRAILS.”
 - PAGE 45 – “EVALUATE, THROUGH THE RMP PROCESS, DESIGNATING ALL OFFICIAL TRAILS AS A MULTI-USE TRAILS“ (I DON’T SUPPORT THE SECOND PART OF THIS SENTENCE ABOUT THE SKYLINE TRAIL)
- SUGGESTION FOR FEATURES MISSING IN THE PLAN:
 ESTABLISH AN EMAIL ADDRESS/PHONE NUMBER FOR ANNOUNCING FALLEN TREES AND OTHER TRAIL DAMAGE DESIGNATE A PERSON WHO WILL BE RESPONSIBLE FOR CLEARING THE TRAIL WITHIN A COUPLE OF DAYS.
 That will prevent significant trail damage, because people create new trails around obstacles and that could be avoided if the obstacles (esp. trees) were removed promptly. Some trees lying over the trails (esp. the less frequently used ones) have been there forever.

LONG-TERM SUGGESTION:

CONNECT THE FELS, WAKEFIELD TOWN FOREST PARK, BREAKHEART RESERVATION AND LYNN WOODS WITH A LONG-DISTANCE TRAIL.

There is a great potential for a long-range mountain biking trail connecting the Fells with Breakheart Reservation and Lynn Woods. I’ve biked from the southern Fells to Breakheart Reservation through the Wakefield Town Forest Park Before and it was a great experience, which involved only a little biking on the road between the Fells and The Wakefield Town Forest Park. There is a trail that goes through the Forest Park and connects almost perfectly to Breakheart Reservation. It only lacks marking, so it’s a little hard to find, but besides that, it’s a great trail.

LONG-TERM FELS DEVELOPMENT VISION:

PREVENT ALL URBAN CONSTRUCTION ACTIVITIES WITHIN THE FELS AREA AND ULTIMATELY PROGRESS TOWARDS UNITING THE WESTERN AND EASTERN PARTS OF THE FELS.

From my point of view, some roads going through the Fells could be closed off as redundant. That would allow the Fells to reunite in a bigger park and it would increase the value of the property around the Fells because the area would become quieter. I would consider the following roads for closing: Woodland Road, Ravine Road, Fellsway East, Pond Street and in the long term, South Border Road. Initially, those streets could be made dead end streets and made open only to visitors of the Fells and locals. Eventually, they could be closed off completely. The same holds for the old hospital. The redevelopment should be

stopped and the area cleared out and turned back into a park. Allowing to build in the heart of the most valuable park in Greater Boston area is a dangerous precedent.

I understand that DCR doesn't own the roads or the property in the Fells and this whole idea might sound like a sci-fi, but I still think it would be a great long term vision for the development of the Fells by the DCR.

Kristina Gaudette

Phone Call

[Notes paraphrased]

I do Cross country ski in the Fells and also have trained for hikes for 30 years

I do see that bikes can crew up trails especially in the winter. Other users also mess up cross-country ski trails.

I also see that in all season, biking chews up trails, and seem to be pretty destructive.

However, I am torn. I know this is a multi-use area, and respect other people right to recreate.

Biking is great sport, but I do think it is destroying the trails

Thank you.

Subject: DCR draft plan for Middlesex Fells

As a dog owner who frequently "recreates" in the Fells, at the Sheepfold Meadow and on the trails with my dog, I am most dismayed to see that the off-leash activity that we have so enjoyed there will apparently soon be curtailed by Ranger enforcement. I have a 34-lb. dog who is sociable and friendly; I do not leave bags of waste anywhere but the dumpster (even if it means carrying the bags with me throughout a walk); and both my dog and I hate the summer heat (my dog will not exercise well in the warmer months unless he can run in the shade; not true of all dogs but true of mine) and seek refuge on the well-shaded trails. It will be a sad day when, if I understand this plan correctly, that I will suffer some kind of Ranger attention if my dog enters a "vernal pool" in 90-degree weather when he is desperately hot, not to mention if my dog can only be allowed off-leash in the hottest area of the Fells - the Sheepfold Meadow.

The Middlesex Fells are really big enough to allow some trail usage by off-leash dogs and their owners. But I suppose that certain dog-haters and their supporters won't be happy until dogs are unable to run off-leash in any forest or on any hill in Massachusetts, actually as well as legally.

The only problem I ever saw in the Fells is that the trail signage seemed confusing. Practically everyone that I have met there in person, dog owners, people who don't have dogs, bikers, seems tolerant and friendly.

Sincerely,

Patricia Floss

Subject: DCR Draft Plan Feedback

Hi,

Just letting you know that I support the proposed draft plan for the Fells, specifically: the expanded opportunities for mountain biking, the trail closures, reducing confusion and dog leashing.

Thanks for all your hard work during this process; it is for the good of the park.

Subject: North of the Sheepfold

If the planning commission would like to improve the safety of the area north of the sheepfold and eliminate the sexual activity they could allow this area to be developed as a Mountain Biking park, a well developed trail of loop through this section would encourage mountain bike activity which would deter the sexual activity. This would also allow both hikers and bikers to enjoy the natural features in this portion of the park.

Fells Reservation Alert

DCR planning to convert the Fells Reservation into a mountain bike park.

Please help stop this plan.

Don't let the nature of the Fells be lost!

DCR Fells Trails Plan re-frames the Fells Forest Reservation as an "urban recreation park"

On September 21, DCR released a Fells Trails Plan with the agenda of beginning to convert Fells Reservation hiking trails to bike use. This would change the Reservation forever.

Natural features will be destroyed throughout the Fells

The biodiversity of birds, wildlife and plants will be threatened

Visitors' ability to safely and quietly enjoy nature will be jeopardized

DCR proposes conversion of these Fells hiking trails to mountain bike use:

Reservoir Trail - Dark Hollow Pond Trail - 'Sections' of Cross Fells Trail and

Crystal Springs Trail - And conversion of nearly all the rest of hiking trails to bike use in the near future

DCR Proposes creating new mountain bike trails through undisturbed woodlands:

Create three mountain bike trails from Bear Hill to Sheepfold
DCR proposes no effective enforcement of any of Fells rules and regulations:

No citations and levying fines for infractions of Fells regulations
No teaming up with the State Police who are willing and able to assist DCR Rangers enforce regulations to protect natural resources and safety of visitors
Just 'two seasonal rangers' with zero enforcement power can't police 2500 acres
DCR presents no means to enforce protection of Priority Natural Communities, Rare and Endangered Species & Habitats, water quality, Vernal Pools, from bike riders riding wherever they choose; DCR proposes no enforcement to preclude the new bike riding influxes from creating the "dense trail networks (which) can disrupt breeding birds, create lethal barriers to amphibian movement, and compact forest soils, among other impacts to general biodiversity." [Lynn Harper Habitat Protection Specialist Massachusetts Natural Heritage & Endangered Species Program; Fells Trails Plan Appendix F]

It is up to us to ensure that the nature of the Fells is protected!

Contact DCR and demand that the Fells Trails System Plan must remain in draft form while a Fells Resource Management Plan (RMP) process is underway. This Resource Protection process is required by law to ensure that all visitors to the Fells have an opportunity to express concerns and ideas for protecting the Fells Reservation.

Your letters are critical if the Fells is to continue to serve as a Reservation -- an area where nature is appreciated and protected for visitor enjoyment.

State that no significant changes in Fells Reservation trail use should be made until the RMP process is completed.

IMPORTANT: You must re-send any previous comments you sent to DCR on this issue since only comments received after September 21st will be considered by DCR.

Send Comments to: Fellstrail.Comments@state.ma.us,
Letters; send to Fells Trails Plan, 136 Damon Road, Northampton, MA 01060

The public comment period ends Friday, November 19, 2010.

Please send copies of any emails or letters to the Friends of the Fells.

Thank you!

Friends of the Middlesex Fells Reservation
PO Box 478 Stoneham MA 02180
friends@fells.com 781-662-2340

Thank you.

To: Comments, Fellstrail (DCR)
Subject: The Middlesex Fells Reservation

To Whom It May Concern:

I am a concerned citizen that uses the Middlesex Fells Reservation (Fells) on a fairly frequent basis. My family and I frequent the Fells for hikes that lead to often picturesque natural locations only minutes from the urban metropolis of Boston and I would like for the natural beauty there to remain for the distant future.

The Fells has been used by bikers, horsemen and hikers with some angst by the naturalists. There seems to be a respect among users of the Fells and our hope is that the natural entities of the park are preserved for future generations. In this vein, I would like that this park continued to be used for all and that its habitat would be maintained for all to enjoy. I hope that the park is not turned into a bike park alone. I believe there are plenty of trails throughout the park and that additional trails are not necessary. Frankly, the ones that are currently in place are over used and are in need maintenance. Additionally, to assure the safety of the park and its users the park should have published rules and police/ranger patrols that have the responsibility and authority to enforce them.

Thank you for considering my thoughts with regards to future changes to the Middlesex Fells Reservation.

Best regards,

Christopher White

Subject: Comments for Draft Fells Trails Plan

Congratulations on the professional trail plan you created. It does an excellent job documenting the existing state and proposing workable solutions. Here are a few points I would like to comment on:

- I am most concerned with the proposal in Section 6.8, "Designate Virginia Wood as "pedestrian only" section of the Fells." This would be terrible for mountain biking. It would

partition the Fells into one section north of Pond Street and another containing the rest of the Fells; there would be no way to get from Gate 41 on Pond Street to any other section of the Fells. I live in Melrose and ride my bike from my home and enter the Fells at Gate 47 on Lynn Fells Parkway. With Virginia Wood access, I can make a very nice ride on the east side, or travel to Gate 34 to ride the west side. Without access to Virginia Wood, I'd be forced to ride on dangerous roads!

- In Section 6.8, "Separate overlapping segments and the number of intersections of the Skyline, Reservoir and Mountain Bike Loop trails if Possible" is a great idea. I hope we can find ways to do this.
- The suggestion in Section 6.8, "Maintain, promote, and enforce "hiking only" trails within the Middlesex Fells trail system," is an unfair use of the trails. If there were some "mountain bike only" trails, this would be a fair proposal. The mountain bikers will be sharing all their accessible trails. So should everyone else.
- In section 6.8, "pedestrian only Sunday's' or other ways of separating trail use is a bad idea and an unworkable proposal. With limited schedules, many people can only use the Fells on one day, and nobody wants to be told they can't do something on their one free day. This simply looks like a dangerous gateway to anti-mountain bike days. The DCR should recognize all users as having equal rights and access.
- I support all of your suggestions in Section 6.9. Specifically, I think "Designate the Reservoir (Orange) Trail as a multi-use trail," and "Implement the Dark Hollow trail proposal" are obvious improvements for all users and should be done as soon as possible. Section 6.9 should go further in opening up more trails to mountain biking, including the Skyline Trail and Rock Circuit Trail. As long as the trails are well designed and maintained, there should be no reason to limit any group's access.
- Regarding Section 6.4, "Post and enforce a seasonal closure for Mountain Biking at the Fells during "mud season" (March 1 to March 31)", I am happy to hear that the seasonal closure will be reduced. However, this policy needs to apply to all trail users. Section 3.1 states that there is no difference between trail users' impacts. Since there is no difference, the winter closure policy should apply to all trail users to prevent pedestrians from damaging the trails during mud season.

Thank you for considering my comments and for all the hard work creating this plan and.

Sincerely,
Francis Blesso

Subject: Middlesex Fells Draft Plan - Comments

Just want to add my comments about this plan. I am on the mountain bike side of this debate and share most of the views of NEMBA. I am also an advocate of shared use of the park. It's big enough for all of us to use in a sustainable manner.

I have several comments, which I will outline below. I'll try to keep them short.

1. I like the plan to open the Fells to mtn bikes for more of the year. Having it closed during the winter seemed a bit of overkill. Certainly limiting access during the wet spring is a good idea.
2. I'm also a big believer in reducing the number of trails. Confusion reigns in there, because of the numerous trails and poor signage. I'm happy to stay on the trails for mtn bikes only, if I could only figure out which trails those were.
3. MORE SIGNAGE. Can't over stress this enough. Maps at each entrance point, and lots and lots of signs at intersections.
4. Embrace technology. The one thing I don't see in the plan is embracing the new technology available to us here in the 21st century. The DCR is doing all of this surveying, mapping, and studying. How about leveraging that data by publishing a GPS file with all of the trails, intersections and other interesting things in the Fells? Then people can download that file to their GPS and load up all the info they need to stay in compliance with the rules. I use my Garmin Edge 705 on my mtn bike every time I'm in there. I've built up a trail network of my own, but I'd love to have an official version.
5. I love the idea of separate trails for hikers and mtn bikers. It's not possible to keep them apart everywhere (nor is it necessary) but it will be good to have places where one will not have to worry about the other. Again, signage is the key.
6. Ambassadors. I also like the idea of ambassadors, as long as it doesn't get co-opted by one or the other of the special interest groups. If it's all NEMBA or all Friends of The Fells, things will not go well.

Over all I'm in favor of the draft as it is right now. I think it's clear that the DCR has put a lot of time, work and thought into this proposal. I also think you've done a very good job of balancing everyone's needs and wants. I can only hope that the future comes to pass the way you've envisioned it.

Thanks for your hard work,
Kevin Brady

Subject: Comments on Fells plan

I'm writing to submit comments on the recent draft Fells trail plan.

I am a Medford resident, and I hike, bike and walk my dogs frequently in the Fells. My main interests are to the Fells become more conducive to mountain biking, as well as to reduce conflict between users.

I'm supportive of opening the reservoir and cross-fells trail for mountain biking. I agree the Skyline trail and Virginia Woods trails should remain pedestrian only. I think it's likely that the steep parts of the Skyline trail would be damaged by mountain bike use.

Better signage and closure of redundant trails is clearly a win for everyone.

I would be happy to see greater enforcement of the new rules once they are applied. Otherwise it is not clear that anything will be different from the status quo.

Thanks,

Paul

To whom it may concern,

For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature.

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

Thank you,

Claire Calcagno

To whom it may concern,

As frequent hikers in the Middlesex Fells and as Medford residents who live across the street from this beautiful resource, we feel strongly that there should be no consideration of changes in the Fells trails access policy until a Fells Resource Management Plan is completed as required by Mass General Law. This recreational area is already under resourced and allowing all of the trails to be used by bikers will only contribute to more deterioration and destruction of wild habitat. Due to already thin resources for patrolling, we continue to have problems with drinking and partying in the fells including bonfires. Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

Please conduct a Fells Resource Management Plan so that we can determine the best way to preserve and protect this beautiful resource for everyone to enjoy.

Thank you,

The Boiler Plate is below.

Personally, as a mountain biker and hiker who lives by The Fells, I don't see expanding the number of trails which are open to mountain biking as a sensible compromise. I believe the present balance is appropriate.

I am a teacher, an outing leader, a biker, a runner, a conservationist -- they all have different needs and push against each other's at times. The impact of mountain biking on the experience of a hiker is very significant. Most bikers are considerate and caring, stopping or moving out the way for hikers. However, the problem is that the tone that is

set when bikers are on a hiking trail (speed, noise, tread path impact) makes for a very diminished experience for the hiker.

Thanks for listenting

I have almost been run over on several occasions by bikers, and had one scary altercation with one who was on a trail that wasn't marked for bikes. I have tried to wall off stands of Lady Slippers when they are bloom by hauling over tree limbs, but the bikers don't care about the rare native plants that grow in the Fells as far as I can tell.

To whom it may concern,

I live in Stoneham and have enjoyed the Fells for many years. Although I can no longer walk my dog in the Fells, as there are too many people violating the leash-law there, and my small dog has been attacked by large, aggressive, unleashed dogs on THREE occasions, I still escape into the Fells whenever I can. As it is, walking along paths puts one at risk from speeding mountainbikers. New changes to the Fells restrictions regarding mountainbikers will, i fear, only make this situation worse. DON'T DO THIS!!

I am opposed to opening the trails to mountain bikes without a full and public review of the impact this would have on the Fells, including the trails themselves, wildlife habitat and vegetation. Provision must be made for sufficient number of additional rangers to enforce regulations of mountain bike use.

To whom it may concern,

I'm a homeowner in Melrose, MA. When I bought my home a year ago, one of the selling points is that it is directly across the street from the Fells. Since moving to Melrose, I greatly enjoy peaceful strolls in the Fells with my husband and my dog.

I am concerned about opening up all of the Fells paths to mountain biking. Mountain biking is currently allowed in select areas of the Fells, balancing the needs of hikers and bikers. The presence of mountain bikers on all trails may overwhelm hikers and lead to safety issues.

Moreover, allowing mountain biking on all trails may cause environmental damage to ecologically sensitive areas of the Fells. DCR should not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan. A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

To whom it may concern:

The Fells Trails System Plan must remain in draft form while a Fells Resource Management Plan (RMP) process is underway.

No significant changes in Fells Reservation trail use should be made until the RMP process is completed.

Why is this necessary?

- Visitors can forget those moments of solitude and peacefulness on our walks and hikes.
- Visitors will watch as sensitive and rare plant communities are decimated.
- Visitors will witness destruction of Fells wildlife habitats.

- Hordes of mountain bikers will descend for biking events in this once peaceful Reservation.
- The speed and danger of wheeled vehicles on walking paths will threaten the safety of all other Fells visitors.

Who will keep the bikers on the allowed trails only? What will the penalty be for biking willy-nilly all over the Fells? How will rare plants and animal habitats be protected?

Please don't take away this beautiful natural resource. I can't imagine enjoying a Fells hike with bikes whizzing carelessly by, and to have no means of recourse when they fail to obey the trail markings and rules.

Please consider other options!

Subject: Fells Trails Plan comment --- keep biking limited!

I've heard that there are plans being considered to open up all Middlesex Fells trails to Mountain Biking. As someone who enjoys quiet strolls through the Fells appreciating its nature, I'm extremely worried about the impact that this would have on the environment

of the Fells. I've seen first-hand the damage that is done by the illegal mountain biking on closed trails, and I wouldn't want to see that endorsed and legitimized on a broader scale.

There is a place for mountain bikes alongside hikers, but it should be on a limited subset of trails that are less subject to root damage or erosion and which have adequate sight-lines to ensure hikers aren't in-danger from speeding mountain bikers.

I grew up in Marin Country, California where mountain biking was born, so I have seen many trails and hiking areas destroyed by uncontrolled mountain biking. Please don't let this happen to all (or most) of the Fells' trails.

Thank you for your consideration,

Erik

To whom it may concern,

I am a 25 year user (walker) in the fells; I love that place and the peaceful walks I have had there alone and with friends. I look for the tiny orchids and small wild flowers that are an amazing experience to find in this urban environment.

A key reason I bought my house here 25 years ago was because of the Fells and this aspect of it. I can walk to the Fells from where I live and have a peaceful experience in any season.

I plead with you to open this process to all voices, not to create any kind of polarization, but to try and find ways to satisfy many different needs and avoid destroying some to please others.

I have great hope that we can gather together to sort out creative and manageable ways to do this.

To whom it may concern,

For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature. And as an urban park it is a pleasure to encounter multiple other users while enjoying the park.

There is no need for a Fells Resource Management Plan. This is simply tactic for the Freinds of the Fells to avoid working with the mountain biking groups in a spirit of community to find a balance of usage that works best for all. The costs and time required to prepare these plans would prevent the DCR from managing most of their parks for nearly a decade.

Fells plant and wildlife will be best protected by getting the proper amount of skilled trail maintenance for all of the hikers, snow-shoers, skiers, trail running, dog walking, and bikers that use the park.

Changes in trail use proposed by the Fells Trails Plan should should go ahead without a costly Resource Management Plan.

Thank you,

Subject: Fells Trails Plan Comment

To whom it may concern,

The Fells is a regular haunt of mine because I am carless and can reach it easily via the Oak Grove T station from downtown Boston. I have been there every weekend for the previous month and am concerned that the DCR is selling short hikers, walkers and others who visit the Fells for peace and quiet. I have nothing against bicycles; I ride one myself on roads and bike paths. But I don't think they belong on hiking trails in the Fells. It presents a danger to me and to wildlife because I and they cannot hear the approach of a bike. The surprise is inevitably unpleasant because it scares me and disturbs my solitude, but suppose I was a small critter and couldn't get out of the way in time...

One day recently I saw several Common Garter snakes sunning themselves along-side the Cross Fells Trail. I am sure that mountain bikers never see wildlife because riding and negotiating the technical challenges that the Fells presents is not conducive to a close inspection of flora and fauna.

The DCR does not have the resources to maintain and police the Fells. There are trees down across trails that require detours, and refreshing and replacing signage always needs regular attention. I have worked on the Rock Circuit Trail in years past, and volunteer help makes a difference. While I have concerns about the impact of bicycles on the environment and definitely think they should be prohibited during the Spring thaw, I am on less certain ground in a discussion about relative impacts of different user communities. There are so many ways to quantify impact; this is a piece of the consideration that should be informed by historical and experiential data. For my part, I will only say it can be said that a bicycle is a machine and out of place in a landscape that should first and foremost be protected as a habitat for non-human species.

Protecting the environment, flora and fauna is critical to the whole visitor experience -- one that should involve all the senses in a positive way. Birdsong, the scurrying of squirrels, snakes and other small animals, water flowing and trickling, the diversity of tree and plant life. I would like to be immersed by the sounds of nature, if not be reminded that my needs are secondary to those others.

The Fells is a gem. It has it's problems, but at present they are mostly due to short resources. Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan. A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors. Subject: Middlesex Fells "Fells Trails System Plan"

Dear Commissioner Sullivan & all those concerned,

I am writing to address my concern regarding the proposed Fells Trails System Plan that is soon to be implemented in part in the Middlesex Fells Reservation.

Before any such action is taken, DCR must conduct a full scale Resource Management Plan that adequately addresses all usages of the Middlesex Fells and the threats that such usages impose on the property. DCR must also follow the guidelines of NHESP to adequately identify priority habitat and species of concern. Identifying all potential priority habitat has not yet been completed and is a process that could take several seasons to complete.

NHESP has stated its concerns to the DCR Trails Plan architects as follows, "beyond impacts to rare species habitats, dense trail networks can disrupt breeding birds, create lethal barriers to amphibian movement, and compact forest soils, among other impacts to general biodiversity." Please do not ignore the concerns of NHESP.

Currently NEMBA maintains a 6.3 mile mountain bike loop trail in the Middlesex Fells. Mountain bikers in the Fells also have access to over 35 miles of fireroads within.

There are also many illegal trails in use by mountain bikers within the Fells. Illegal trail usage will continue with or without the addition of more mountain bike trails due to the fact that there is no plan in effect that allows state police and rangers to enforce rules and restrictions. This issue must be addressed.

With climate change as it is, can we really define a mud season or limit it to the one month period (March 1-31) that NEMBA is proposing? An increase in mountain bikes during mud season will cause much erosion and disturbance to the forest floor, forever changing the landscape as we now know it.

Should we open up DCR property for after dark usage? NO. Absolutely not. There are species that move about between dusk and dawn that would be adversely affected. There are already enough environmental pressures on these species that threaten their existence. The amphibians, reptiles and mammals that call the Fells their home deserve to be protected.

Also, opening up DCR property to after dark usage will lead to other problems, in particular the safety and protection of those wishing to use the property after dusk. Who will police the property at such times?

Shared usage of trails is not a good idea. Most of the trails are not suitable for this. Hikers, especially those with young children using the trails, should not have to be concerned about a mountain biker flying down the trail and potentially causing injury. Also, the solitude enjoyed by hikers should not be disrupted by mountain bikers.

Fireroads that are shared by bikers and hikers should remain unchanged. They are wide enough to handle both and should perhaps be set up so that bikers can have their own lane.

Should unmarked/unregistered trails (a.k.a illegal trails) be legitimized? NO. There are reasons why trails are not legal and maintained in these areas. Just because there are unmarked/unregistered trails in use does not legitimize making them legal mountain bike trails. Consideration needs to be given to why we conserve open space and the preservation of habitat. Human recreation in the reservation is important, but one must remember that it is a place that we visit. It is not our home. But it is home to many other species and the landscape should not be riddled with more "legal" MBT's or hiking trails for that matter that degrade and erode the forest floor.

This is what NEMBA had to say on 9/07/2010 in response to an upcoming DCR meeting: "We believe DCR knows what the right thing to do is. This meeting will show us whether they can act on that in clear and immediate ways."

They also stated the following on 6/7/2010: "Don't be afraid to express your outrage (appropriately) that DCR is backing away from their planning process and yielding to those

who can't share A PUBLIC RESOURCE THAT WE ALL SUPPORT THROUGH OUR TAX DOLLARS."

It is my understanding that the reservation is a "Natural Resource", not a Public Resource as NEMBA views it.

Therefore in response I have to ask you, Mr. Sullivan, what is the right thing to do? Is it not to protect natural resources and promote and regulate responsible recreation on DCR property? I urge you to promote responsible usage of the Middlesex Fells Reservation so as to protect habitat, prevent degradation of the landscape and provide a safe place for all to recreate.

Please do not allow mountain biking lobbyist such as NEMBA to unduly influence the decision making process. As the past has proven time and time again, trail usage must be regulated.

Please take the time to address all of the issues, to come up with a Resource Management Plan for the Middlesex Fells and to adequately survey for priority habitat and species of concern in accordance with the guidelines put forth by NHESP.

Thank you for your consideration.

Sincerely,

Cheryl Miller

Subject: Please continue to reserve certain trails and areas for non bikers

As a somewhat older walker/hiker, I frequently use the trails that are supposedly off limits to mountain bikes. Imagine me blithely scrambling up a hill and having to jump off the path because two or three bikes come barreling down. It happens now, but the restrictions do provide me with a clear primary right to the path.

I am not a naturalist, so I am not sure how serious the effects will be on the natural habitat and erosion of less restricted bike usage. A full environmental resource impact plan should be done prior to changing the rules and creating conditions that will permit sanctioned, rather than illicit, use of large areas of the Fells reservation in a much more invasive manner. The torrential rains this year washed away a lot of soil and made some trails difficult to use for a while - further destruction of vegetation cannot be a good idea.

Thank you,
Linda Robinson

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

Personally, I have lived in Medford since 1998 and I have hiked the trails on nearly a daily basis since then, in all seasons. I recently encountered a couple who was hiking and they commented on the peacefulness being like 'paradise'. I have witnessed destruction of the habitat and existing trails on Rams Head Hill that has been done by mountain bikers, digging holes in the soil in order to build-up biking ramps and jumps. This destruction scars the land and kills the plants, significantly disrupting the ecology of this treasured green space.

Thank you,

To whom it may concern,

We chose to buy a home in Medford, in large part, because of its proximity to the Fells. We are a young family and enjoy peaceful hiking with our children as well as running and hiking there on our own. Any change in trails usage that expands biking will drastically reduce the safety of the Fells for non-bikers. We often jump out of the way of bikers. Last year, I had a near miss while grabbing my son to pull him from the trail as a lone biker raced by. I was six months pregnant and would have been hit if we were not very alert and quick. We were on a trail closed to bikers.

Anyone who hikes regularly in the Fells will confirm that there is little to no policing of the area or enforcement of rules. In six years, I have never seen anyone from the DCR in the Fells. Dog walkers let their dogs defecate on and off trails and do not keep them on a leash. It is impossible to imagine that the increase in biking will be monitored any more rigorously. Non-bikers will be unsafe and the environment will be degraded. It's bad enough now, why make it worse? Why not value such a gift?

If the Fells changes in the way now proposed, we will be looking for our new home in a community with safe access to shared natural space. It will be a shame if the Fells changes in this way and we will miss the area.

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

Thank you,

Katherine McVety

To whom it may concern,

I am writing to ask you to wait for, review, and consider the details of a comprehensive Fells Resource Management Plan prior to making any changes in the Fells trail usage.

My family has enjoyed the Fells for over 22 years. My son often runs in the Fells: something he has been doing since he was a High School Cross Country runner. My husband used to take hour long walks in the Fells every Sunday while our daughter took ice skating lessons at the skating rink close by. My neighbors with young children frequent the Fells. We all, in our own way, value and appreciate what the Fells has to offer. Opening hiking trails to bike use could significantly change and put at potential risk, not only the safety of our children's access to the Fells, but the serenity and wonder the Fells currently offers.

I would like the Fells plant and wildlife to be protected for generations to come. I would like my grandchildren to be able to experience the Fells as it is today: a beautiful, serene oasis. A safe place for all plants, wildlife, and visitors.

Please make any changes in trail use proposed by the Fells Trails Plan as part of a full Resource Management Plan.

Thank you for your consideration.

Sincerely,
Gail Norcross

To whom it may concern,

We take our 3 year-old and 18 month to the Fells regularly. It is a place we know that they can walk in peace, wander around the trail, and look at things without concern for being run over by bikes or cars. I run there regularly and it is a place where I can find peace. This is a rare resource on our side of the city that our family appreciates tremendously.

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan. A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors. Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

To whom it may concern,

I write in opposition to the expansion of Middlesex Fells Mountain Bike access.

Biking is currently allowed in the Fells, I'm sure mountain bikers want more access, but I want to be able to walk with my family without fear. We already need to be careful on the larger trails/roads, and that's ok, I'm glad to see the bikers enjoying themselves, and I'm glad they have a place to do it, but they have enough.

I'm a fan of target shooting, archery and hunting, but I wouldn't want to see that in the Fells. In a community of dense population and limited woodland acreage, we must share our resources. Mountain bikers shouldn't be excluded, neither should they get the run of the Fells.

Please, no expansion of the rules, at least not until after completion of a comprehensive Fells Resource Management Plan.

Thank you,

All the best-

Joseph Zamparelli, Jr.

An RMP is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells. Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

As employees of a state agency, we look to you to uphold the interests of local Fells area residents. Woods have always been places of peace and quiet and communing with nature. Speeding bikes with riders yelling, is not our idea of peace and quiet. If, after an RMP, mountain bikes are eventually given access, we request that this access be limited to a set area where walkers/hikers are less frequent.

Thank you,
The Cotton-Arbo family

To whom it may concern at DCR -

For over a century the Middlesex Fells Reservation has served as a place where visitors can experience and appreciate nature. Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan. A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors. This is essential to protect Fells plant and wildlife communities, and to ensure the safety of everyone who enjoys the Fells. Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

I am a resident of Lexington, MA, where recently our local ConCom responded to resident concerns regarding degradation of local conservation property by dog owners and professional dog walkers. Trails, plant life and wildlife in the Willard's Woods area were all negatively impacted through overuse of the property by one particular population. There is now a compromise plan in place that took into account comments by ALL users. Perhaps the DCR could live up to the CONSERVATION portion of its name and take a similar approach.

Thank you,
Barbara Tarrh

To whom it may concern,

As we all know, once a privilege is granted, it is very difficult to take it away.

For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature. Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

Right now, the children can run ahead for a little distance, enjoying freedom not easily experienced in today's world. If there are bikers on the trail, it would be too dangerous as a bike's approach is sometimes very quiet, but fast.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan. Thank you.

Sincerely,

Janet Polcaro [REDACTED] Medford MA 02155

A major consideration in the purchase of my house was the proximity to the Fells. I regularly walk in the Fells for relaxation and exercise. Allowing wider access to bikers will deprive me and others who enjoy the solitude of the woods. The very nature of biking is in conflict with a quiet appreciation of wild places. While the Fells may be compromised by its proximity to urban areas, it offers an opportunity for those of us who live here to slow down and savor the world around us. Surely there is a better place for folks who want to challenge themselves with speed and rough trails to enjoy their pass-time - it should not be at the expense of those of us who have been appreciating the fells over the years in more traditional ways .

In particular, opening up almost all the Fells trails to biker would completely ruin the experience for those of us who just want to walk around, free of fear of being run down. Not to mention the erosive nature of mountain bikes.

And since enforcement of the existing restrictions on mountain biking is pathetic, the bikers will essentially take over ALL the trails: given an inch (a very big inch), they'll take the mile.

Dear DCR,

You have a critical responsibility in the upcoming decision about trails usage at the Fells. I am concerned that DCR is short cutting the process and yielding to pressure from certain interest groups, and as a result aborting the proper review processes. Your decision will impact the reservation for decades to come. For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature.

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

To whom it may concern,

I walk in the Fells regularly myself, with my children and with my dog. I thoroughly appreciate the large network of trails and the accessibility of the trails for all kinds of people right in the middle of so many communities.

I feel that if the trails are opened to mountain biking people who want to use the trails for walking will be much more reluctant to do so. As it is when I run into mountain bikers who currently use the trails (not sure if they are supposed to be there) I feel unsafe and I feel as if they think I am in their way. They go so fast and you need to jump off the trail to get out of their way.

Mountain bikers tend to be from one cohort - the ones I see are mostly men in their 20s and 30s. Given the need for people of all ages and abilities to get exercise I think the Fells should remain a comfortable place for all people to go in order to commune with nature and get exercise without needing to fear for their safety.

I would sincerely ask that you not open the Fells trails to mountain biking.

Thank you,

Rebecca Dempster

Subject: Fells trails comments from John Lewis

Dear Sirs,

As a user of the Fells trail system and having much experience with the, planning, use and regulation of natural public open space in the Boston area I would make several practical comments about the Fells Resource Management Plan (RMP) that is in process..

It is important to have the whole RMP agreed upon and functional before changes are made because

- 1) Any use that is presently permitted is very difficult to change without a lot of work.
- 2) Any existing use that is not permitted is just as difficult to change.
- 3) Weak enforcement against a destructive use translates in a short time into a permitted use.
- 4) A partial implementation of a plan causes confusion, allowing anybody to interpret the rules as they wish.

It is important that there be no significant changes in Fells Reservation trail use should happen until the RMP process is finished. for the above reasons. There are many more good reasons, but destructive uses will take place in a very short time-frame if the RMP process is not completed properly, and rapidly become irreversible politically.

Thank you ,

John Lewis

To whom it may concern,

For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature. I walk the trails daily and love the quiet, peaceful time taking pictures of plants and wildlife all year around. I urge you to not change Fells trail usage until after

completion of a comprehensive Fells Resource Management Plan has been fully and appropriately conducted.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors. This Plan would certainly take into consideration the history of these great woods and protect Fells plant and wildlife, along with ensuring the safety of everyone who enjoys the Fells. Being a nature enthusiast and nature digital photographer. I have run into several bikers already who have asked me to move out of the way on a very narrow hiking path so they could continue along. I chose this area for the fact that there is something for everyone here at the Fells. I'm concerned not only for my safety but also have bikers zooming along the trail scaring wildlife away which would destroy the opportunity to capture local wildlife in the natural habitat.

We all should be able to enjoy the solitude of the Fells and changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

Thank you,

Christine Vogan

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

The DCR is supposed to protect the natural resources of the Commonwealth, not stand by while they are destroyed. What is wrong with DCR?
The current proposed changes to usage of the Middlesex Fells would open many, if not all, trails to mountain bike use with ruinous results to the natural beauty and peacefulness of the Fells.

Thank you,
Nancy Free

One of the major benefits of the Fells to area residents is the peaceful ambling on the trails, relatively quiet compared with the environment in the surrounding neighborhoods, with only foot traffic on the trails. Allowing mountain bikes on the trails would seriously degrade this benefit.

To whom it may concern,

I understand that there are already sufficient trails for bike use. A real effort needs to be made to maintain the walking trail system which is much gentler on the natural environment. This large tract of protected natural land is unusual so close to urban areas. The comprehensive Fells Resource Management Plan should be completed before any trail use changes are considered.

I walk in the Fells almost daily and have observed bikes everywhere, regardless of signage. The land erodes from bike use is dramatic and damaging. I sincerely hope this can be contained to the wider, packed pathways, but what I've encountered is bikers pushing through the most delicate foliage looking for biking challenges and certainly not in the Fells to experience the beauty and serenity that will disappear if biking continues at this level.

Subject: Middlesex Fells Trail Draft Plan

To whom it may concern,

I recently had the pleasure of reading 2010 trail system plan for the Middlesex Fells Reservation and as a mountain biker; I was elated to see significant progress made towards trail access and park improvements. Having ridden and enjoyed the trails in this wonderful reservation for years, I have at times been very frustrated with some of the conditions and impositions placed upon mountain bikers that I see this trail plan correcting. Namely, initiatives

6.2 Maintain, Improve, and Close Trails in Cooperation with Stewardship Partners

This is, I believe, one of the more important points within the draft plan that not only emphasizes the desire to provide better constructed/maintained trails, but also seeks to establish trails that are enjoyable for all parties. It is important that feedback from all parties is sought as each possesses certain, unique skills that can benefit users of the Fells. Healthy partnerships with entities that can step in and provide assistance when the DCR does not have the resources to do so are a step in the right direction.

6.3 Improve Trail Systems Map and Signage

The current trail map/signage is, at the moment, very inadequate. There are a multitude of trails and connecting trails lacking any identifying information. It would, in my opinion, be a worthwhile effort for the Fells to follow the example of the Blue Hills Reservation South of Boston. By labeling trail intersections with numbers corresponding to an official map, navigation would be simplified significantly.

6.9 Improve Mountain Biker Trail Use Experience

I cannot stress enough how important it is to uphold the following point, "Work with stakeholders, such as the FOF, to encourage their members to be respectful of mountain bikers in the Fells." It is unfortunate to see a group such as the Friends of the Fells preclude mountain bikes from the many activities listed on their site. Trail use by bicycles is vilified, and several statements on their website seek to uphold this general hostility. They state that the draft trail plan includes provisions to, "create three mountain bike trails from Bear Hill to Sheepfold." This is either a deliberate attempt to mislead people into believing that new trails will be cut through "undisturbed woodlands", or a lack of reading comprehension as the plan clearly states that the routes will be established on existing trails. It goes on to say that a new mountain bike trail will be created to link Flynn Rink to the south end of Spot Pond. In no way does the draft trail plan say this, as again, it clearly states it will be an "all persons trail." The lies put forth by the Friends of the Fells are a shameful reflection on their organization and demonstrates the disrespectful attitude its leadership has adopted towards bike use in the Fells. I would like to see this hostility addressed in the future to reduce the number of uncomfortable interactions between these two stewardship partners.

I do however see room for improvement. Initiative 6.8 mentions the possibility for user designated times. I can only imagine that the goal of this is to reduce conflicts between certain users groups, but it all precludes individuals whose schedules do not fit into these arranged times to enjoy the Fells. I take great objection to this initiative.

In summary, I am excited to see the DCR finally addressing the issue of mountain bike access. The histogram representing user interests is a clear indicator that a strong majority is in favor of expanding bike access beyond its current levels. I am hopeful that this plan is executed with the cooperation of the stewardship parts and that we can all enjoy the park to its fullest in 2011. Please do not hesitate to contact me if you wish to speak further concerning my comments. Thanks for your time.

Sincerely,
Tim Souza

To whom it may concern,

As an Alderman at Large for the City of Melrose, I believe the DCR has a legal and ethical obligation to undertake a complete Fells Resource Management Plan. before considering any changes that would impact the Middlesex Fells Reservation and I am requesting such be performed. Many of my constituents enjoy the pristine beauty of this resource and instituting changes that would have long term, possibly irreversible affects, is not only irresponsible but downright arrogant. Is it any wonder our citizens are concerned about public agencies being held accountable to taxpayers when indiscriminate decisions are made affecting their quality of life? Please do not allow DCR to become one of these agencies.

For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature. Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

Subject: Middlesex Fells draft plan

I appreciate the work involved in creating the draft plan and support much of what is in the plan.

However, I strongly believe that there should be off leash dog opportunities. I have hiked extensively in state parks and conservation areas in New Hampshire where dogs must be in leash or voice control. This includes Bear Brook State Park, on multiuse trails shared by hikers, mountain bikers, horseback riders and off leash dogs. This is an extremely workable approach and one I think the DCR should follow in the Fells.

Subject: Fells Comments

Hello DCR/Paul,

After reading Middlesex Fells Draft Plan I have serious concerns. While some of these concerns align well with the plan, one specific item does not. I agree that there are too many trails in Fells and they need to be reduced and signage improved. I also agree that it is in the Commonwealth's best interest to reduce maintenance costs and increase stakeholder buy in by formalizing relationships with organizations that do good in the park. With that said I disagree that some premiere trails should be single use – in this case hiker.

The standard in the Fells should be shared use; perhaps in a few specific areas single use should be considered. This approach is needed for many reasons including:

- 1) 1) It has been proven that an undesirable element moves in to areas that are off limits.
- 2) 2) For stakeholder buy in park access should be fair and equitable, not such that it eliminates access to the premiere trails in the park just for certain users.
- 3) 3) A single use plan will reduce stakeholder buy in and increase the financial burden in a time that the Commonwealth cannot afford it.

These reasons just begin to scratch the surface why all or most trails should be multi-use.

I've been Mountain Biking for almost 10 years. In that time period I've become a trail guide – in the fells and a Mountain Bike Patroller. Over the same period I've ridden many DCR parks and I've discovered the ones that work the best are the ones that provide fair and equitable use for all shareholders. Park's like Lowell Dracut and Lynn Woods should be the standard and not the exception – they work well and prove there is no reason to reinvent trail access. I would really like to buy-in to this plan and I will not be able to as it is currently written.

Thanks for your time,
Anthony Gabrielson

Dear Sir/Madam:

I am writing to oppose the opening of new bike trails. As an avid walker and hiker of the Fells I feel that more needs to be done to protect the trails and make it a safe place for walkers, hikers and a place where we can bring our children to enjoy the natural beauty. I personally have had close encounters with the people who bike the trails and they ride at high rates of speed and can appear out of nowhere. They are a nuisance and a hazard. There are many other places for these people to ride their bikes and it shouldn't be in the Fells.

Thank you in advance for your consideration.

Subject: Comment about the Draft Plan.

I wanted to comment on the draft plan. I have a few comments and a few questions.

- 1) If the Friends of the Fells (FOF) wants no major trail changes to occur until the RMP is completed, then why are they assisting with this project: Bird Meadow Restoration at 90 mm Site . Shouldn't a RMP have been completed before nature was disturbed. According to the FOF website the Bird Meadow Restoration meant cutting and clearing land? What are they restoring? It sounds to me like the Friends of the Fells killed many trees and shrubs so they could engage in bird watching. I would have hoped that they would leave nature alone and protect the Fells as their website claims. They state that they are restoring the land to meadow? Why was it meadow? Because of farming? Because of the 90MM site? Nature takes its course which is to turn a meadow into woods. I find it very hypocritical that the FOF is worried about existing trails having more usage, but they are fine with artificially manipulating the forest for their bird watching pleasure?
- 2) If the Friends of the Fells (FOF) wants no major trail changes to occur until the RMP is completed, then why are they assisting with this project: Major Trail work – installing stairs? It seems that a more natural path would be to not install massive stairs in a forest? Do deer and fox and turkey like large stairs? I understand water bars and wood walkways over mud, but massive stairs. I feel like I am not in the woods when I am hiking and come to stair cases built by moving huge rocks?
- 3) If the DCR holds off with any major trail maintenance until a RMP is complete, as requested by the FOF and their powerful wealthy backers (Sierra Club, Audubon Society),

will the FOF then allow the DCR to make changes to trail usage once the RMP is complete? Even if it means allowing other users other than hikers to have access to the trails? Or will they come up with some other argument or lawsuit further wasting tax payers dollars?

This is the real question. I do not fully understand the RMP and I am willing to go along with the FOF and have it completed first, but only if they put in writing that once the study is done, that if the DCR decides based on the study to modify some of the existing rules that the FOF will not fight those changes.

I use the Fells for the following: hiking, trail running, walking my dogs, running my dogs, mountain biking, snow shoeing, cross country skiing. I also love observing the wildlife. I am a multi user. I do not want to Fells to turn into a mountain biking play ground. Just like I do not want to Fells turned into a dog park, or a x-c ski park or a snow shoe only park. I prefer to continue to be able to enjoy all aspects of the Fells. I find people on bikes, trail runners, x-c skiers, people with dogs, bird watchers all mostly pleasant. I would hate to have any trails limited for dog use, bike use, hiker use, trail running use. I think the motto should be – Can't we all get along? Is Harold State Park a mountain bikers playground?

I do find it offensive that the DCR is being accused of that by the FOF. (see text below taken from their website). The DCR has a difficult job to do and they do it well with limited funds. Keep up the good work and keep striving to maintain a healthy balance of resource usage.

Hello Friends of the Fells. I guess you forgot to put: Mountain biking and hiking damage?

This is the orange trail. I guess all the hikers and FOF people just fly over this? Or do they walk around it to keep from getting mud on their shoes? How long did this take for the FOF to fix? It took years. Maybe if FOF spent less of their time and money fighting everyone in court and more of their time and money on trail work, they would have fixed this before it got out of hand.

NEMBA would have had this fixed in a month if allowed to do work on this trail. Nice work FOF.

Trail Restoration Works! (really? I wonder why NEMBA has its own trailer, tools and a huge supply of young strong workers? What does the FOF have?)

Subject: Comments on the Middlesex Fells draft plan

Dear Department of Conservation and others,

I am writing to express my strong interest in a more inclusive, collaborative approach to resource use and environmental management in the Middlesex Fells. As a scholar and professional in the area of resource and environmental management, I am disappointed to hear that--despite all of the recent community discussions, surveys, etc. regarding potentially altering the Fells management plan and making the state park more accessible to different resource users--the current draft Fells plan remains very protectionist and prohibitive. I am a conservationist and am first and foremost committed to preserving the quality and integrity of our natural spaces (and, as someone who has lived in many places throughout the U.S. and abroad and therefore recognizes what a true gem the Fells is for the Boston Region!); however, I feel that continuing a protectionist approach in the Fells will not best achieve true conservation and proactive environmental management for that area. Instead, I firmly believe that the management focus needs to be shifted from restricting and 'keeping people out' toward empowering a variety of resource users to effectively engage in responsible use and preservation of the park.

Of particular interest, I highly recommend opening more trails to mountain bike users. I am a mountain biker and have been very impressed with how committed mountain bikers in the region are to maintaining trails, protecting fragile areas, and otherwise preserving the integrity of the Fells. From my experience, it seems that restricting mountain biking to only the 'mountain biking loop' turns likely preservationists into illegal resource users, as mountain bikers choose to illegally use other trails for a lack of other

reasonable options. While I fully believe that not all areas should be mountain-biker friendly, I also firmly believe that mountain bikers in the Fells use the trails respectfully and considerately, and that engaging and empowering stakeholders such as NEMBA through opening up more trails to mountain biking use will prove more effective in achieving long-term sustainable management than will trying to keep them out (especially as enforcing ineffective restrictions is very costly and typically is not the most effective use of the DCR's money, time, and energy).

Additionally, I encourage the DCR to revise the dog regulations for the Park. While running and riding through the park, I often encounter dogs who are off leash, and have never had an issue with any unrestrained dog anywhere in the fells. Nor have I seen any evidence that these dogs are a harm to the local wildlife, or a danger to the integrity of the park's ecology. I do think that dog owners must be responsible for their pets and I am in full support of strong penalties for irresponsible owners, but feel that imposing on-leash-only limitations is not effective and needlessly makes responsible dog owners into law-breakers.

Based upon my studies, research, and professional experience in community-based environmental management, I think that the 'solution' lies in engaging all stakeholders who use and value the Fells, and encouraging them to be responsible resource users rather than violating them through imposing needless restrictions on them. And I hope that the DCR is willing to implement a more innovative, forward-looking strategy in the Fells that seeks to bring people in and empower them to be good stewards, rather than trying to keep them out.

I apologize for the long-winded comment, but effective resource management is something I am passionate about and, as someone who is dedicated to good stewardship of New England's fabulous natural resources, I truly hope that a more proactive, empowering approach to management will be implemented in the Middlesex Fells. Please contact me if you have any concerns or if you or anyone else wishes to discuss this more.

Thank you for your consideration.

Kindest regards and cheers,

Subject: Fells trail plan...

Hello,

I write to you as a frequent user of the Middlesex Fells to support the plans to change some of the usage practices. I am a hiker, dog owner and mountain biker and I am glad to see park management looking toward opening up more sections of trail to mountain bike users. Mountain bikers, particularly through NEMBA, play an active role in maintaining the park and by opening more of it to compatible uses like cycling, park management can help to deter the illicit uses that continue in some parts.

Most of the other parks in Massachusetts allow mountain bikers and hikers to use the same trails and in the other parks I frequent, this has not led to conflict. Most cyclists are responsible and courteous to other park users, and that's an experience I've seen both from the saddle and as a hiker.

Thanks for your hard work in the upkeep of this park. I look forward to the day when more of it is open to me as a cyclist.

Best regards,

Scott Malone

Subject: Comments on DCR draft Fells plan

To Whom it May Concern,

I was at the meeting in Medford in September where the Fells Draft Plan was introduced. I am a multi-use user of the Fells. My main use is mountain-biking but I also hike and bird-watch there. In the winter I xc-ski there on the rare occasions that it is possible. In general, I thought the DCR did an excellent job on the Draft plan - I feel it was balanced well between the needs and desires of the hiking and biking communities. I appreciate your putting in writing that all users generally have equal impact on the trails. I also think that by shortening the winter bike ban to March only, there is a better chance of adherence to this. Riding in mud is definitely one way that mtn bikers get a bad reputation.

One thing that I think would help, as I think about possible conflict points between mountain bikers and hikers, is to work on eliminating the surprise factor. People don't like to be surprised by a mountain bike suddenly appearing out of nowhere and blasting by. So I would propose that extra signage (and I'm sure you could work with NEMBA to make this happen) could be posted in conflict-potential areas. The blind corner in between gates 18 and 19 is the biggest of these, but also other narrow hills with the potential for fast riding....there's a rocky hill on the mtnbike loop east of gate 19 - a rider coming down that would certainly spook a hiker. The signage could say something about "Mountain Bikers please control your speed / share the trail" or something like that. Again, I think NEMBA could help with this.

I had some thoughts about ways to enable that walkers/dogs don't wreck the xc ski tracks on the few possible ski days in the Fells, but that seems like a lot of work for something very ephemeral.

Overall, I applaud your plan and think my suggestions could help ease the transition to increased trail-sharing.

Best regards,
Karin Turer

Subject: Mountain Biking in The Fells

I moved to Melrose from Cambridge 8 years ago, in large part, because of The Fells. I hike there most Sundays throughout the year. Like most

people who visit the Fells regularly, I love it. My husband and I plan to leave money from our estate for improvements to The Fells.

I believe that The Fells should be used by all people for various types of recreation. However, allowing mountain bikers on all the trails is a very bad idea. From a purely selfish point of view, it changes my hike from a quiet, wilderness experience to one where the bikers, typically a small pack of young men, are racing each other and are charging up from behind, shouting at me to move out of their way QUICKLY. I can move quickly, but not everyone can - which poses a safety risk. Mountain biking disturbs the wildlife, tramples the fauna and widens the trails. I don't begrudge the enjoyment people get from mountain biking, but can't we please continue to limit it to specific areas so The Fells doesn't become a giant mountain biking course with some trees?

The Fells already has many visitors who leave their detritus (I have found bike parts). Even well-intentioned bikers are not going to stop and pick up any garbage and garbage is, as you know, a problem in The Fells.

Sincerely and Worriedly,
Elizabeth Golding

Subject: Fells Trails Comments

October 15, 2010

Massachusetts Department of Conservation and Recreation

Firstly, let me thank DCR, and those who have expended personal time and energy to ensure continued wellbeing of the Middlesex Fells.

I appreciate the effort that has been made to revise and implement the trail system plan. Additionally, I appreciate the openness with which DCR has listened to the groups involved.

I have evaluated the entire proposal, as well as information provided by the Friends of the Fells and NEMBA.

I am a frequent hiker and mountain biker at the Fells.

To be honest, I find the actions of my fellow hikers to be base and embarrassing. Often, when speaking with fellow hikers, I hear comments intimating that 'the park must be closed to bikers'. When cycling, I often hear rude comments, have people tell me to 'get off the trails', or meet hikers who will not let me pass. It seems to me that the attitude of the FOF is 'bikers must be banned'.

These activities and attitudes are not constructive.

Rather, I would like to commend the DCR on taking a more 'scientific' approach to trail allocation. Land managers must consider the opinions and concerns of the people who use their trails. However, when individuals make unsubstantiated allegations regarding natural resource damage to justify the prioritization of their type of trail use, their motives must be called into question.

Objective information must be the basis for sound policy decisions. The results of scientific studies can provide land managers with a better understanding of user impacts, and should guide political debate and public policy.

As is mentioned in the report, numerous scientific studies have demonstrated equivalent environmental impact of cycling, hiking, and horse-back riding.

Yet, there continues to be a push for 'hiker-only' trails.

My view is that responsible users should have equal access to trails regardless of which activity they chose to enjoy upon them. Use and enjoyment of a natural resource should not be restricted to satisfy the interests of a single group. Rather, rules regarding use and enjoyment of a natural resource should be based on the preservation of that resource such that ALL users may enjoy it for years to come.

Regarding some of the individual recommendations:

- The mud season ban should extend to all users, on all single track trails. However, all fireroad and dry sections should remain open to all traffic.
- Closure of any section of trail must be reasonable and appropriately justified. This will promote acceptance of the restrictions by all users. It is stated within the report, that "Perhaps the most difficult aspect of user behavior in the Fells, from a management perspective, is a pervasive attitude that posted rules don't always apply". If a trail is closed to any group (hikers and bikers alike) that is unreasonable, or based on inappropriate justification, it can be expected that users will break that rule, and continue to use the trail. This promotes disregard for the rules in general, which will lead to trail damage. (This is similar to it being 'acceptable to litter in a area that looks like a dump'. We all agree that it is never acceptable to litter, yet areas that have trash on the sidewalk continue to have trash thrown on the sidewalk).
- If individual trails are to be reserved for a single activity this should be the exception, rather than the rule. In rare cases, and only when necessary, a policy such as "all of the marked trails are open to all users with the exception of trail A, B and C which are open to hikers only, and trail D which is open to cyclists only" would seem most appropriate. This approach instills the mindset that all users are equal. The current system ("all trails are closed to cyclists except...") continues to promote the notion that the Fells is primarily for hikers.
- The Skyline trail is an integral component of the park, and thus, should be open to all users.
- Virginia Wood is an integral component of the park for cyclists and hikers. Its restriction would prevent cyclists from doing a complete loop around the Fells. I am concerned that its closure will be construed as 'unreasonable' and thus its use will continue despite a restriction. I would like to point out that this would also be the case if Virginia wood was designated as 'Cyclist only'; you can expect hikers to continue to use it.

- Separating park use by time/day of the week will be cumbersome and will continue to promote the idea that all users are not created equal.

Thank you again for your time and effort.

I look forward to being able to enjoy the Fells as a cyclist and a hiker. And I look forward to the day when the two groups are treated equally.

Ryan King

Dear Paul Jahnige,

First off, thanks a lot for spending so much time on this piece of land. It must be one of the most studied properties in Massachusetts!

Here are my comments to DCR's recommendation:

6.1

Yes, absolutely close trails that have dead ends or are near sensitive areas and those spider-webs

"No net gain" plan as I understand DCR will close as an example 300ft of trail if 100ft are to be build, how soon, is there a time window for this to happen? Between closing old and opening of new trail?

6.3

Yes, new maps are a must, for download or to purchase at local stores such as REI and bike shops and even local supermarkets. New signs with length of trails marked, expected users you may encounter (exactly as in appendix I): perfect! Trail blazing brought up to standard, so there is lot less confusion for the users.

6.4

Figure out a legal way through MWRA's property, this is the only way to get from one side to other for number of reasons such as cutting your trip shorter

Mud season closure just for bikes? How about other user groups? I do like the fact that it's only during thawing season in March.

6.5

More parking yes please, but let's not implement day use fee. This would just create more illegal parking around those areas. There is so much parking at Bear Hill and Boston

Regional Medical Center, working with local land owners to increase it is a good idea. Another thing to look at is when (if ever) this property gets redeveloped, it should be legal to park there to access Fells.

Access from Flynn Rink to Fells near Quarter mile pond, yes I like that the sooner the better.

6.6

I'm pretty sure all "hard core" users that are close to their stakeholder groups are very well aware of trail etiquette. I would point out to occasional user not tied to any group, so posting of these at trail heads makes all the sense! So it's clearly visible to all, especially to novices or newcomers.

Trail ambassador = DCR's ranger that's just my opinion and yes they should be more present at peak times, to educate and enforce if needed.

6.7

I'm not so convinced about police on trails, but again it's just my opinion.

Number of dogs per walker it's a good idea to limit and I'm all for designating a large area for "off leash K-9 users"

6.8

Virginia woods as pedestrian area only, how about letting bikers use one trail to get from Whip Hill area to reservoirs

I don't think it's a good idea to have separate times for different groups of users

I agree on separating Mountain Bike loop from skyline trail and getting rid of junctions.

6.9

Yes for bikes in Dark Hollow on existing trails and close that spider-web! And use those miles of trails some other place more suitable and sustainable.

Orange trail multiuse YES! And let's work on Cross Fells and Crystal springs in near future too. I would even push for multiuse on Skyline and Rock Circuit. There aren't that many bikers that can handle this type of trail so the impact on them would be minimal, as it is from any user group.

6.10

And finally I'm for letting those dogs off the leash! Let them run! But do it some manageable way at Sheepfold but again not time restrained.

Few more things

After sunset use by mountain bikers, I don't think we are looking to use Fells at midnight or middle of night but rather to somewhat to extend ride times in autumn months when weather is still warm and sun goes down early.

Here is an example of good trail design in Manchester, NH

<http://www.fomba.org/files/trail-map.pdf> loops at different difficulty levels, length coming off fire roads not so interesting to someone traveling by foot but rather to someone traveling on two wheels that can cover more distance. This is a good way to keep specific trail users in their "places"

And please don't let Friends of Fells get away with stalling tactic of waiting for full RMP process to be completed before implementing smaller steps in the right direction

Subject: Draft Fells Trails Plan

Dear DCR,

It has been very exciting for local MB riders the news regarding the project to enlarge some terrain for bikers at the Fells.

The Fells has historically been seen by the outdoor enthusiasts as a special retreat area located just a few miles from the big city, affordable, attractive and very appreciated by users of all ages. In some ways, it is the only one park around the metropolitan area where people with different interests can gather together for all year round activities such as, mountain biking, hiking, family picnic enthusiasts, dog's walking etc. The beauty of the place is that everybody has the possibility to share this natural context with respect of all other people's interests. The recent obstacle plotted out by non biker local Organizations operated behind the scene has put a dark veil on the positive atmosphere of the park.

As a biker, outdoor enthusiast and good citizen, I was shocked by the discriminative effort of certain Organizations towards MB riders at the Fells.

NEMBA has always tried to operate in full respect of local or state policies by engaging mountain bikers toward a respectful, nature oriented, use of the trails at the Fells. I firmly believe that a regulated enlargement of the trails able to be used by all people, including MB riders, is a great way to help people to get in contact with the nature, teach them how to respect the natural environment and help them to adopt a healthy life style. Discriminating among the potential users of the park is not sign of a wise, democratic policy.

I hope that DCR will be able to clarify some existing issues on this changes and to embrace a democratic line of action which can take into account the expectations of all the users of the Fells, mountain bikers included. It will be the responsibility of the various local Associations and, ultimately, of the single individuals, to instruct the users on a courteous behavior and respectful use of the trails for the sake of everybody.

Also, I am confident that NEMBA will offer his contribution to help restoring some of the most hazardous trails in the park and organize events to help people gathering together with sympathy and reciprocal respect. An educated mountain biker share the same vision of any other outdoor enthusiasts at the Fells: fun and respect toward the environment so to have the chances to return and enjoy the experience in the future.

Very truly,
Lorenzo Silvestri

Subject: Fells Trail Comment Copy

Dear www.fells.org,

Once you start to believe that supporting the position of the Friends of the Fells should be the most appropriate thing, one sees that it really has no objectivity and its one more piece of a two-sided argument between the moutainbikers and walkers/hikers.

I am writing to say that I am deeply disappointed about what I'm reading in your site (www.fells.org). Not to say it is irresponsible to state arguments which -to my knowledge- are not such.

1-"And conversion of nearly all the rest of hiking trails to bike use in the near future"

2-"DCR Proposes creating new mountain bike trails through undisturbed woodlands"

To my knowledge, there is not statement of making every trail a biking trail -short or long term.

Also, I believe the draft is clear to say that no new trails will be created for bicycle riding on currently non-trail undisturbed areas.

I believe it is extremely important to develop an integral environmental impact assessment of all activities carried out by the community at the Fells and make a Plan accordingly. This plan should include all and every community concern and activity, such as: a) guaranty environmental sustainability and local ecosystems b) provide the peaceful, quite environment users seek c) at the time of creating alternative trails for other -community oriented uses- to satisfy everyone's needs equally, again guarantying a sustainable ecosystem.

It is sad to see that there is no inclusive proposition from any local organization, rather a campaign of misinforming the community.

Sincerely,
Diego

Walk/Hike/Photograph/ and friend of people who ride in the Fells.

Subject: Wilderness Solitude

"However, the Fells is a popular and heavily used destination. It is not a wilderness area. While users may be able to find moments of solitude in the Fells at certain places, seasons or times of the day, users should not necessarily expect to find solitude in all instances, nor expect that moments of solitude might not be disturbed by other users." [p. 28]

Wilderness: An unsettled, uncultivated region left in its natural condition, especially:
A large wild tract of land covered with dense vegetation or forests.
A piece of land set aside to grow wild.

The Middlesex Fells Reservation certainly meets this definition of wilderness, and the fact that it exists in a suburban setting is cause for wonder and celebration, rather than this summary dismissal by our own Department of Conservation. It's true that if you stand on the edge looking outward you may be looking at the sprawling city, but turn around on Pinnacle Rock and you will be looking at a sea of green trees stretching northward for miles. Since its inception the Fells Forest hasn't been logged, leaving the trees to grow to giant status, and for nature to direct itself, growing wild and untamed. Bobcats and Beavers, Fishers and Owls call it home, recognizing its wildness as suitable habitat. This wild Fells is not an Urban Park, with planted trees, clipped shrubs, mowed lawns, and paved paths.

It is heavily used by people, particularly in the areas around the larger parking lots. But in the rest of the Fells, finding solitude is more common than not, to the extent sometimes that I wish I were "disturbed" by a fellow traveler, because it seems a terrible waste that I alone am enjoying this wild place full of beauty. In many times and places I have gone for hours on end without seeing anyone in the Fells Forest, and if I choose to, I can do so on a regular basis.

In this world of impermanence there are few things that don't change, but there are some that carry an eternal resonance within us, that touch a deeper chord, like this grand old Fells Forest. Those woods and boulders, streams and birds, are always there whenever we choose to turn to them. Dipping into a world that changes at a much slower pace and scale, we form a bond with the land; an old gnarly tree hanging onto a ledge, the quiet hollow by a pond, where dragonflies ply the air like brilliant flying jewels. What peace of mind we can know at these times, when we connect with the forest's timelessness. Serenity? Solitude? These are ours for the asking, and the forest always answers yes.

That is, unless we despoil it by ignoring it's beauty, leaving our workaday trash in our wake, our animal's waste polluting the soil and air, or bringing our metal machines into every last corner of the green world, where their noise and speed are dissonant. When we do these things we ignore the sacredness of the earth, of that relationship we have with it. We were born of the earth and will go back to it. It nurtures us with pure food and water and fresh air that we take for granted as our birthright. But it is every generation's birthright, not just our own. If the future Fells Forest of our children and our children's children is not to be industrially bleak, we must learn to cherish it, protect it from misuse, and nurture it back.

"Without plants there is no life. The functioning of the planet, and our survival, depends upon plants." UN Convention on Biological Diversity, 29 Oct. 2010

Subject: Fells Trails Plan Comment

To whom it may concern,

The Middlesex Fells Reservation is a gem, and especially so because walking is safe and encouraged for all ages and physical abilities. For over a century, it has served as an idyllic land holding where visitors can experience and appreciate nature. Unfortunately, an expanded use of the trails by mountain bikes is incompatible with the long time and heavy use of the Fells.

It is critical that that Department of Conservation and Recreation not change Fells trail usage until it completes and thoroughly analyzes a comprehensive Fells Resource Management Plan.

A Resource Management Plan must consider environmental and safety impacts of opening hiking trails to bike use, and include plans for enforcement of all regulations to protect Fells resources and visitors. This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan. Based on my frequent walks in the Fells, expanded mountain bike use is inappropriate and would be significantly detrimental to the enjoyment of the large majority of regular users of the Fells. Too many current mountain bike riders are inconsiderate, travel too quickly thus endangering walkers, and cause permanent damage to trails. That problem will only be exacerbated by expanded mountain bike use.

Thank you for considering my comments.

Sincerely,
Rebecca Backman

Thank you for the opportunity to comment. I lived in Medford until 1988

and, as an outdoors activist, greatly appreciated the Fells. I was pleased that there was no mention of clean-ups or trash, as that was one of the activities I did with my kids - informal trash pick-ups, with a bag for returnables and one for trash - they kept the deposits. They loved it. We hiked there often with our dog - there was little conflict at the time with other dogs, bicyclists, etc.

My comments:

Hold clean-ups as required - seeing the beautiful place with major trash was depressing. We particularly picked up above Panther Cave.

I agree this is no place for motorized uses.

A trial off-leash area sounds like a valuable idea.

Interpretive information on the natural environment sounds very valuable - I think such signs make natural systems seem more important.

Thanks for your good work - keep it up.

Subject: changes to Middlesex Fells trail policy

To whom it may concern,

I am writing to express my opposition to the wholesale change in trail designations proposed for the Middlesex Fells by the DCR.

Over the past two or three years, I have attended several public meetings about this issue, and have become familiar with the particulars. I have lived just three blocks from the Fells for the past 12 years, and have spent hundreds of happy hours biking, walking, and cross country skiing in this rare treasure of a woods. It is an exceptional place, rich in recreational opportunities and also diverse - and in some areas fragile - in animal and plant habitat. Having explored all areas of the Fells, especially those areas West of Interstate 93, I am convinced that the DCR's proposal to open virtually all of the existing trails to mountain biking is a very bad idea. Some roads and trails, such as Middle Road, East Dam Road, and the Silver Mine Path, are perhaps appropriate trails for biking because they are wide and not particularly steep and rocky. On the other hand, the Cross Fells, Skyline, and Reservoir Trails are, in my opinion, unsuited to biking either because they are too steep (and therefore unsafe), or too narrow to accommodate both hikers and bikers. I have spent enough time in the Fells to know that if all these trails are opened to mountain biking, hikers will indeed be displaced and the character of the park will change dramatically.

I am also opposed to opening the Fells to winter mountain biking: mountain biking is not a winter sport, and one or two mountain bikers can quickly destroy good ski track used by dozens of skiers, by exposing rocks as they scrape snow while skidding (I have seen this happen on more than one occasion). Furthermore, I would oppose any opening of the park at night, since this would definitely invite increased late-night partying (and collateral vandalism) by teenagers, as well as disturbing (and quite probably displacing) nocturnal animals who make the Fells their home.

In the public meetings I have attended, it has become clear to me that the New England Mountain Bike Association is a well-organized and vocal lobby that has gained the attention of the DCR to the point that the DCR is willing to allow this group to steer policy regarding trail policy, and even to the point of disregarding current law about how these decisions should be made. In particular, I am referring to the DCR's refusal to produce a Resource Management Plan of the Fells before making sweeping changes in trail designations. To me it is beyond belief that a state agency with the word "Conservation" in its very name would act in such an irresponsible manner.

I understand the DCR's need to provide recreational opportunities for the citizens of the Commonwealth, but the DCR also has a responsibility to fulfill the conservation part of its mandate. This involves taking the time to conduct a careful and complete Resource Management Plan of the entire part before making changes that will change the character of this unique resource forever. Therefore, I am asking that no new changes be made in trail designations until the DCR has completed a RMP process that is open, transparent, and public.

Respectfully,

Peter Houk

Subject: Opposition to designating more multiuse trails in the Middlesex Fells

I strongly urge you not to change the Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

I live in Melrose adjacent to the Middlesex Fells and have been enjoying this area for the past 24 years. I am passionate about protecting this precious resource. I have spent time in the fells hiking, birding, skiing, boating, blueberry picking, rock climbing, observing plants, animals, and insects. It is my way of escaping from our busy, noisy, hectic world and connecting to the natural world. The Fells offers me a place of refuge and solitude which is in "my backyard". I have been treated to many special times in the Fells.

My primary concern lies with the proposals to "1. Evaluate Designating Sections of the Cross Fells Trail and Crystal

Springs Trail as Multi-Use 2. Evaluate Designating All Appropriate Trails as Multi-Use Trails".

Mountain bikes should not be allowed on single track trails. Single track trails should not be modified to accomodate bikes. My primary concern is erosion and safety for hikers. Several years ago I saw a sizable patch of lady slippers with mountain bike tracks (this was not on a designated bike route). I am concerned the solitude I enjoy while hiking will no longer exist when I have to worry about getting out of the way of mountain bikes and hearing the noise they make on the trail. When I want solitude I hike on trails where I know I will not find dogs or mountain bikes. I don't want Virginia woods to be the only area I can hike in.

I think the Fells can be enjoyed by a wide variety of people: bikers, dog walkers, hikers, nature lovers being the main people. However there has to be a plan to manage the increased number of people using the Fells which focuses on preservation of this area. Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

Thank you,

Laurie Adamson

Subject: Opposition to Multi-Use Trails in the Fells

My wife, Laurie, and I have lived within a short walk of the fells for the last 25 years. We hike, bird watch, and observe plants, trees, and the small creatures which call the fells home. For us hiking in the fells is a way to find a quite contemplative environment and escape the hyperactive world that exists in the world just beyond the edges of the fells. There can be no such escape on a single track hiking trail shared with bikers traveling at speeds much higher than walking speeds. Any trail given over to multi-uses including biking forces my wife and I to seek alternate routes. For this reason we encourage the people who make decisions with regard to trail use to not increase the number of multi-use trails at the expense of hiking trails.

I support the development of a comprehensive Fells Resource Management Plan.

Subject: Middlesex Fells

The Middlesex Fells, located north of Boston, is one of the oldest state reservations in the Commonwealth. At 2,575 acres, it is also one of the largest urban wilds in the metropolitan Boston area. The Fells contains an amazing array of plants and animals that live among its rocky hills, woodlands, wetlands, ponds, and meadows. Mass Audubon has cited it as an Important Bird Area.

The Fells is also very popular for a wide range of recreational uses including hiking, bird watching, mountain biking, dog walking, and cross country skiing, uses of which Mass Audubon does not oppose.

However, as recreational use has increased, so too have conflicts between park users and the park's natural resources. There are over 122 miles of trails in the Fells, some of which have been illegally established through unauthorized off-trail activity. DCR remains understaffed and unable to fully and adequately enforce its trails rules, the result of which is continued and in some instances expanded unauthorized trail activities in unauthorized locations.

DCR has made a commitment to develop a comprehensive Resource Management Plan (RMP) which will address both resource protection and recreational uses. Mass Audubon supports development of the plan, and believes that the Fells can continue to provide a wide range of recreational uses while simultaneously protecting the Fells' natural resources. However, before the comprehensive planning has begun, DCR issued a draft Trails Plan that proposes several major changes regarding allowable uses including:

Designation of an off-leash dog area;

Opening of several hiking-only trails to mountain bikes;

Allowing bike riding during the winter.

Please focus on developing the plan and repairing damaged areas before considering any expansion in recreational uses. The 3 measures taken here are not compatible with protection of the environment. Thank you, Eleanor MacLellan Cambridge, MA.

Subject: fells trails plan

I am a Medford resident and live abutting the Middlesex Fells. I am also a contributor to the Friends of the Fells organization, and not a

member of NEMBA or any other mountain-biking advocacy group. I am writing because I support the increase of trail access to cyclists. I have had a number of encounters with cyclists in the Fells, and have never felt that they cause a problem or interfere with my enjoyment of the reservation on foot. Increasing legitimate access for mountain bikes will only increase the pool of stakeholders in preserving the Fells for all of us to enjoy. My only concern is that reasonable rules are established for courtesy between users, restriction of activity to marked trails, and respect for nature, and that these rules be enforced for all users -- cyclists, dog walkers, and hikers included.

Sincerely,
Scot Shaw

Subject: I disagree with expansion of bike use on Fells trails

My family and I have been frequent users of Fells trails over the past 35 years (hiking with my children when they were young and now going on hikes with Fells guides). I am extremely disappointed in the amount of bicycle traffic already allowed on the bike approved trails in the Fells. I can see that bicycle traffic has damaged these trails already. I do not want the other trails to be allowed to be used since they are in much more sensitive areas and would do even more damage to plants and cause more erosion.

I see from reading the MidFellsDraftPlan2010-9-20 that you have a very large input from Mountain Bike Enthusiasts and that as part of your planning are considering "Evaluate Designating Sections of the Cross Fells Trail and Crystal Springs Trail as "Multi-Use" and "Evaluate Designating All Appropriate Trails as Multi-Use Trails". Both of these "Enhance Mountain Biking User Experience" goals are under RMP (Resource Management Plan) review.

What I am saying is that I disagree with your considering the Cross Fells Trail and Crystal Springs Trail as "Multi-Use". I also do not like the undefined nature of the goal "Evaluate Designating All Appropriate Trails as Multi-Use Trails".

Please, before allowing Fells Trails Plans bicycle policy changes to be considered do so only as part of a comprehensive Resource Management Plan

and be far more detailed in what trails are being considered and what might be the environmental impact of relaxing trail use standards to allow mountain bike usage.

Thank you, John Thompson

Subject: fells plan policy change

Dear people of the DCR,

I am writing to you today to let you know how much and for how long I have loved and used the Middlesex Fells Reservation. In the late 70's early 80's I started hiking many of the trails with friends. Some photo's I took during one of these hikes was entered in my high school art show, something I didn't plan nor imagine. Continuing into the 80's I would hike with my sister and her children. I continued hiking most of the trials with new friends and my niece and her child. When my dog was recovering from hip surgery we used some of the trails for his physical therapy. Now I walk the various trails on a weekly basis with my dog (always leashed) and my dad. For me, it is my way to relax and unwind. The beauty and tranquility of the Fells brings me peace. And I am grateful that I have been able to share the sights, sounds and smells of nature with the people I love. I believe that is what was intended by the donors of this land over a century ago.

I am urging you to PLEASE only consider the Fells Trails Plan policy change, as part of a comprehensive Resource Management Plan public process. The Fells is a sanctuary for all, people, plants and wildlife. Please don't let it be destroyed.

Thank You for your time,
Becky Graves

Subject: Biking in Middlesex Fells

To Whom It May Concern,

The Fells' future should consider every user group, specifically walkers. A wide-open recreation park was NOT what the Fells was intended for. We must keep it a place where nature is appreciated and honored. We need a Resource Management Plan, and a public process, to protect plant and animal life before any policy changes are considered.

There are 35 miles of trails already open to bikes. To turn the Fells into a bike recreation area is NOT what the Fells was intended for.

I have already been hit by an out-of-control biker on a walking path. I have seen the ugly effects bikes have caused on the plantlife and beauty of the Fells. Please listen to the walkers who use the Fells daily and are concerned about its future. To do what you propose will ruin the Fells for future generations.

Subject: Proposed Fellstrail Changes

To the Department of Conservation and Recreation:

It is hard for our family to believe you are even considering this, but please do NOT convert all the hiking trails at the Fells Reservation to bike use. Our family has lived in Winchester for thirty years. We reside at 63 Lawson Road. Our home is within walking distance of the Fells, and we walk and hike there regularly. In fact, the Fells trails were part of the reason we wanted to live in Winchester.

Within recent years, we no longer feel that the Fells is "friendly" to older walkers and families with young children. Instead, it seems that mountain bikers are taking over. Even without this proposed change, we are distressed by the number of trails that are being destroyed. As a result of mountain bikers, many of the trails are severely rutted and often muddy, making them inaccessible for the rest of us. Bikers also frequently use trails that are supposedly off limits to them. Finally, some bikers have the attitude that they "own" the trails. I am a senior citizen who has been frightened by the aggressiveness of rude bikers, coming up behind me and shouting for me to get out of the way. This is not what we want the Fells to become. Instead, we want it to continue to be a place of peaceful walks in nature, beautiful plant communities and diverse wildlife.

We think 35 miles of trails for mountain bikers is enough. PLEASE DO NOT OPEN UP ALL THE FELS TRAILS TO MOUNTAIN BIKERS. WE ALSO NEED BETTER RULE ENFORCEMENT, SO THAT NON-BIKE TRAILS ARE SAFE AND QUIET (as a nature preserve should be) FOR FAMILIES WITH YOUNG CHILDREN AND SENIORS TO WALK IN HARMONY WITH NATURE.

Sincerely,

Marilyn Ellwood

Winchester, MA 01890

Subject: Fells Trails Plan Comment

To whom it may concern,

For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature.

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

Â Â

This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

Thank you,

Please do the right thing!

Margaret Holland-Burke

Subject: Fells Trails Plan Comment

For over a century the Fells has served as a Reservation where visitors can experience and appreciate nature. First it was commercial development; now it is expanding the use of the Fells to its detriment and ours.

I implore you to make no changes to the Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells.

Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan. It is telling that requests by no less than six organizations for a Resource Management Plan process have been ignored.

Thirty-five miles of the Fells is already open to bike use. There is no need to make the entire reservation open, disturbing flora and fauna and making for the fast deterioration of one of few natural areas left in eastern Mass.

How much commercial development and erosion of our natural resources are we to endure?

Thank you for your consideration.

Richard Gulla

Melrose, Mass.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. Subject: proposed Fells trail plan

The proposed plan to increase the number of trails open to bike use is unacceptable to the people of the surrounding towns.

The Fells Reservation is the only natural park in this increasingly urban area where people can go for solitude and enjoyment of nature.

Bikers do not come for enjoyment of nature, they want a challenge and a workout. Their present use of the Fells is already disturbing to wildlife, plantlife and walkers. To increase the use of trails will have devastating effect on the nature value of the Fells.

Just imaging that the traffic going by in front of your house is now allowed to go through your backyard as well. What would you do? Move out. The animals will do the same.

The name of the department is of Conservation and Recreation. It seems to me that you are not doing your job on the conservation if you allow more bike use in the Fells.

Subject: Protect the Middlesex Fells

Dear public officials,

I am writing to you to express my opposition to the proposed increase in recreation at the Middlesex Fells without a comprehensive plan by the Department of Conservation and Recreation (DCR) to protect sensitive areas.

The less "developed" lands are the ones whose value increases the most over the long run, and it is important to protect the natural services, whose loss is often extremely costly, and often unrecoverable. An ounce of carefulness is worth a ton of remediation, and it is important not to put the cart before the horse.

I am not rejecting your plan to add trails and encourage increased use, because I think it is very valuable to expose the public to nature, but (and this is a big but), this should not be done without a plan to protect sensitive areas.

Sincerely,
Jonathan Beit-Aharon

Newton, MA 02458

Subject: Fells

Dear Sir(s) and/or Madam(s):

I write to you this evening after much thought about the hiking trails and bike trails.

This is a bad idea on many levels. First, I would like to inform you that while hiking, my nephews and nieces use the trails along with me. They range in age from 5 and on. We sometimes walk a mile and other times a little more. I feel that if we will share the trails with the bikers, there will be many accidents between the children and bikers. I want to inform you, the committee, that should anything happen to any of my family members someone will be responsible. There is no regard being given to the individual which is walking the trails to see nature and lecture our little ones about the process of life.

I beg that the committee makes the right choice!

Please read the following:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. Subject: Middlesex Fells Trail System Plan

Follow Up Flag: Follow up
Flag Status: Flagged

I am writing to comment on the Middlesex Fells Trail System Plan which DCR released on September 21, 2010. Over the past decade or so, I have visited the Fells frequently, probably an average of 2-3 times per month, usually on weekends. My favorite activity in the Fells is hiking, often with other family members, and also with my small dog. I have also been a member of the Friends of the Middlesex Fells for the past several years.

I attended the Fells Reservation Trail Planning Workshop back in February of 2010, and I also attended the public announcement of the Fells Trail plan in September. In addition, I have read over much of the Trail System Plan released on DCR's website. In general, I have been impressed with the plan that DCR has put together, and I agree with many of the goals that DCR is trying to accomplish. In particular, I think it is worthwhile to reduce the number of trails within the Fells, and I also think that trying to reduce trail-user conflicts is a vitally important goal.

However, I do disagree with some of the specific recommendations made by DCR. First and foremost, I strongly disagree with the proposal to designate the Reservoir Trail a "multi-use" trail, which means opening it up to mountain bikes, and I certainly disagree with the idea that all trails should be designated as multi-use trails. In my opinion, the Reservoir Trail is the "crown-jewel" in the Fells trail system, and I believe that having mountain bikes on this trail would have a seriously negative impact on the ability of hikers to enjoy this trail. I think that hikers and mountain bikes should generally not be sharing any trails, since mountain bikes travel at somewhat faster speeds, posing somewhat of a danger to hikers and dog-walkers. Mountain bikes also are noisy, and take away from the more peaceful appreciation of nature that hikers are often looking for. And finally, I believe mountain bikes also cause more erosion on certain trails.

But I am not entirely against mountain bikes in the Fells, and I think a modest increase in the number of trails designated solely for mountain bikes can be justified. In particular, DCR's plan to increase the number of mountain bike trails in the Dark Hollow area seems appropriate to me.

Another DCR recommendation that I disagree with is the plan to increase the number of parking spaces in the Fells. I think that the current perceived lack of parking actually helps to restrict overuse of the Fells, and by limiting the number of people in the reservation, it

most likely helps the ability of wildlife and plant life to thrive in the Fells. I also am not in favor of paving over more of the natural landscape in order to greatly increase the number of parking spaces.

The final comment I would like to make concerns the rules pertaining to dogs in the Fells. While I support the plan to allow dogs to socialize off-leash at the Sheepfold, I would also like to see dogs allowed off-leash, with certain restrictions, on at least one trail within the Fells. Although I realize that some off-leash dogs do pose a mild threat to the environment of the Fells, by running through the woods well out of sight of their owners, I believe that off-leash dogs that stay on the trails close to their owners, as most dogs do, do not pose any threat to the Fells environment. I realize this distinction may be difficult to enforce, but I would like to see at least one trail designated for off-leash dogs who stay within 15-25 feet of their owners and are under voice control at all times.

Once again, I appreciate the effort made by DCR with regard to the future plans for the Fells, but I hope that the final plans will incorporate some of the changes I have outlined above. Thank you for your time.

Sincerely,

Kevin J. Hazel

Arlington, MA 02474

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Subject: Changes to the Fells Reservation trail system

I am writing to strongly comment on the proposal to convert the entire Fells trail system to include bike use. I feel that it should not be changed from a reservation to a recreation area. Bicycle use does change the trails, as well as the overall tone of the reservation. I am in the Fells frequently (it is one of the reasons I bought my house near the Fells 25 yrs. ago), and bike use is a real intrusion on the wonderful natural oasis that it is. Pls. work out a comprehensive resource management plan, with a public process, before making this change.
Thank you.

I support DCR's Draft Trails Plan for the Fells!

Name:
Daniel O'Connell
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Subject: Proposed changes

Dear Friends of Nature,

As someone who has walked the trails in the Middlesex Fells for more than 30 years, I read about proposed changes to the Fells with great surprise and alarm.

The Fells to me is a forest that is meant for passive recreation and the contemplation of nature -- so necessary in these fast-paced times. Hard-riding bicycles, and I have seen too many of them in the Fells, make this difficult to impossible. Bicycles can be ridden on or alongside of most any street. Forests are few; and as you know the Fells is unique in the immediate Boston area.

I'd rather have no biking in the Fells at all, but I can live with what exists now. I would admit that it seems to be a reasonable balance among people with different interests. But the Fells is special, a one-of-a-kind place, and it should at the very least be kept that way. No more biking in the Fells.

Thank you for your very serious consideration.

Bill Berkowitz

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Subject: Fells Trails Plan Comment

To whom it may concern,

I live in Belmont and have been going to the Fells for years to hike because it is by far the best place within a short drive to be out in the woods, have miles of quiet hiking trails, and

have plenty of trails with vertical rise as opposed to fairly flat. Keeping the Fells the way it is as a quiet place for hikers and walkers to experience and enjoy the outdoors near the city is very important to me and a number of my friends. I am very concerned at this time that changes in the Fells trail usage that will include opening more trails for mountain biking could disrupt the peaceful environment of the Fells, cause destruction to wildlife habitats and rare plant communities, and threaten the safety of Fells visitors given the speed possible on mountain bikes.

So, I am making a very strong request that the Fells trail usage not be changed until after completion of a comprehensive Fells Resource Management Plan. A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors. This is essential to protect Fells plant and wildlife, and to ensure the safety of everyone who enjoys the Fells. Changes in trail use proposed by the Fells Trails Plan should only be considered as part of a full Resource Management Plan.

Thank you for considering my request.

Subject: please don't expand bike use in the Fells

Dear DCR,

I recently learned that you are considering opening most of the Fell's hiking trails to mountain bikes. As a frequent walker in the Fells for more than twenty years, I would like to urge you not to do this.

First, mountain bikes are jarring and somewhat dangerous for those of us going at walking speeds. They commonly come up behind me on the trails and their riders have varying amounts of control of where they are going. For safety's sake I often step off the trail in order to let them go past, but having to do that frequently, and keep an ear out for bikes approaching from behind, disrupts the peacefulness of the woods. If you encourage more mountain biking on more narrow trails, you will have more frequent encounters between bikers and walkers, and sometimes they will be collisions.

Second, bikes greatly increase erosion rates. I often see tire marks, sometimes deep ones, on the trails. Many bikers are willing to ride through mud, or just off the trail to the side, thus increasing erosion. Even bikers who are polite, however, leave more of a mark than walkers do.

The Fells are already a well-worn woods. The erosion and soil compaction make it easy to see that many people use it. But bikes have more impact than walkers, and the more you encourage biking the more worn the woods will look. Cities talk about a "broken windows" effect -- if a neighborhood looks worn down and not well cared for, people are more careless in it and the damage accelerates. The same thing can happen in natural areas -- if they look fresh and beautiful, people want to keep them that way; if they look eroded and damaged, people are less careful not to add to the damage.

Please do not change your policies to encourage more damage to the Fells.

Thank you for reading this letter and for your consideration of this issue.

Sincerely,

Lori Kenschaft

Arlington, MA

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Name:
rich slezak
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

I support DCR's Draft Trails Plan for the Fells!

Name:
Rob Zimmerman
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. I support DCR's Draft Trails Plan for the Fells!

Name:
Lennon Schroeder
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Subject: Proposed Fells Trail Plan

To whom it may concern:

I am concerned about the plan to open additional Middlesex Fells Reservation hiking trails to bike use and the impact it will have on the ecology of this wonderful resource. Before making any policy changes I feel a comprehensive resource management plan considering environmental and safety impacts of the changes and with provisions for enforcement should be put in place. I would oppose any changes until that process is completed.

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

I support DCR's Draft Trails Plan for the Fells!

Name:
Lorenzo J Morin
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

To: Comments, Fellstrail (DCR)
Subject: Fells Resource Management Plan

To Whom It May Concern,

I would like to voice my strong opposition to DCR's proposal to convert the majority of the Middlesex Fells Reservation hiking trails to bike use. This idea is completely the wrong approach to protecting the extremely valuable asset we have in this beautiful area.

There are already 35 miles of trails available to bike use. The DCR's proposal would greatly diminish this area, not to mention that the

Fells Woods has never been, and never should be, considered as a wide-open recreation park....this is NOT what this area was intended for!

The Fells Trail Plan policy changes should be considered only as part of a comprehensive Resource Management Plan public process.

To approach this in any other way would be completely irresponsible.

If you have any respect and appreciation for the Fells, then let common sense prevail and protect this wonderful asset of nature before irreparable harm is done to it!

Sincerely,
Thomas McCarthy

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

- 2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
- 3. 6.3: Better signage, trail markings and clear maps. Yes!
- 4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
- 5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
- 6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
- 7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
- 8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I support DCR's Draft Trails Plan for the Fells!

Name:
Steve Pierson
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Al Cooper
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Subject: Feedback/Comments on DCR Fells Plan

To Whom It May Concern,

I am writing to provide my feedback on the DCR Plan for the Fells. I live in Melrose and use the Fells 2-4 times a week year-round. I hike the trails, ride my mountain bike, and, during the winter months, snowshoe. I have never had any problems with other hikers or bikers, and I encounter a lot of people on the trails. People are generally respectfully and friendly - we share the trails. When on my bike, I slow down and call out to let hikers know I am behind them. When hiking, I step aside to let bikers by. These "basic rules of the trails" are usually followed by everyone. If someone doesn't follow these rules, it is unusual.

I also encounter a lot of dogs on the trails. These dogs are rarely on leashes, but they have been well-behaved. They have not chased me while on my bike, nor have they been aggressive towards me. The owners are very attentive and make sure their dog(s) are close by (i.e. not blocking the trail) or being overly friendly when it is unwelcome. I am not a dog owner, but the happiness of the dogs when they are walking the trails only adds to the enjoyment of being at the Fells. Everyone loves to be outside on the trails. Finally, I know that mountain biking is frowned upon and many seek to limit mountain bike trails at the Fells. I disagree with this. There should be equal access for all activities. Not only do bikers use the trails, but they also help maintain them. In the Spring, many bike riders came to Trail Work Days to clear brush and fallen trees and to fill in trails that experienced water damage over the winter. Bike riders are mindful that trails are a resource that require care and maintenance. They invest their time and energy to give back and make sure the trails stay in good condition.

The major items of the plan that I support as changes at the Fells:

1. 6.1 - Reduce the Trail Inventory - to increase habitat and reduce confusion.
2. 6.2 - Formalize partnerships with stakeholders like NEMBA, AMC and others.
3. 6.3 - Improve signage and trail markings, and make clear maps.
4. 6.4 - Limit Winter Closure from March 1 to March 31.
5. 6.9 - Designate Orange (Reservoir) Trail as shared-use.
6. 6.9 - Implement Dark Hollow Pond Trail Plan and designate it shared-use.
7. 6.9 - Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use.
8. 6.9: Evaluate other trails for shared-use.

The items of the plan that I do not support as changes at the Fells:

- A. Making the Skyline Trail hiker only. (This trail should be shared-use.)
- B. Keeping Virginia Woods hiker only. (This trail should be shared-use; otherwise, it will prevent completion of a loop encompassing the entire Fells and prevent residents who live adjacent to it from riding into the park.)
- C. Implementing different days/times for segmenting use. (I do not support assigning dates and times for different uses.)
- D. Requiring dogs to be on leash when on the trails. (The owners who have their dogs off-leash are responsible. Their dogs are well-behaved and well-trained.)

Kind regards,
Alisha Feustel

Subject: Trails Plan response

Dear Paul,

Attached is my response to the Trails Plan for the Fells, somewhat modified from the paper version I gave you on Friday.

I look forward to the meeting on Wednesday with you and Conrad Crawford along with some of my colleagues of the Friends of the Fells.

I share your hope that we can get to looking forward. I am sincere when I conclude my attached response with the hope that more positive times lie ahead. But I think you will need to start by hearing my colleagues out on their deeply held concerns.

The Friends of the Fells is modest in formal strength but clearly representative of thousands of users in the towns surrounding the Fells. But we do not have the lobbying, membership or financial strength of the single user, region-wide group NEMBA. From our perspective we are the David to their Goliath. We also believe you have had more previous contact with NEMBA and are sympathetic to their demands.

Having said that, we must hear from you and Conrad on Wednesday about positive ways where we can all contribute to the betterment of the future Fells.

Sincerely,

Bryan Hamlin

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. I support DCR's Draft Trails Plan for the Fells!

Name:
Matt LePard
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Subject: Fells Trails Plan

Hi,

I am a Massachusetts Audubon Society member, and I am also an avid mountain biker who belongs to the New England Mountain Biking Association. I've give it some careful thought regarding the proposed Fells Trail Plan.

I would like to voice my opposition to the proposed Fells Trail Plan because I feel that it is premature to allow expanded trail usage until after a Resource Management Plan is completed. Sure, I would love to ride my mountain bike there, but it is more important that the sensitive wildlife areas and vernal pools are protected before expanding the trail usage. The proposed Fells Trail Plan does not provide the necessary and essential protection of the sensitive areas at the Fells.

Thank you for the opportunity to comment on the plan.
Cathy Corning

Wayland, MA 01778

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. I support DCR's Draft Trails Plan for the Fells!

Name:
Matt Hamor
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Subject: Support for Fells Trails Plan

Dear DCR,

I am writing to express support for the proposed plan to develop sustainable trails at the Fells. The plan enhances access for all and protects the habitat. Please do not let the opponents prevail in misrepresenting the situation. Mountain biking should be included in the ongoing activities. There is ample evidence that when properly done there is no difference in environmental impact compared to hiking. I applaud your efforts.

Thankyou,
Don Chiulli

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. I support DCR's Draft Trails Plan for the Fells!

Name:
Steve Taylor
Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Subject: Fells Trails Plan

To DCR representative:

I strongly urge you to consider making changes to the Fells Trails Plan policy ONLY as part of a comprehensive legally required Resource Management Plan public process. The DCR must protect the Fells plant-life and wildlife as well as protect the safety of everyone who enjoys the Fells. You must have a plan for enforcement of ALL regulations to do this. The Fells future must consider every user group.

The land is called the Fells Reservation, not the Fells Recreation Park!! It doesn't matter that bikers want to access more of it. You must not change the reason for its existence without input from all users, especially the ones who are using it for the reason it was

legally created - peace and solitude. Biking the hills will destroy them. Everyone can already see the damage done to the 35 miles of existing open trails by bikes. And I've seen bikers - they are not into peace and solitude. They are into intense activity.

Moreover, the potential for a serious accident with a pedestrian is eminent. Are you prepared for the eventual litigious situation that will occur when a biker speeding through the woods knocks over a child?

Can you really be considering a change to the destiny of the Fells to suit this one group at the expense of the group who is using it for what it was made for? You must include the public, not just the biker public, when discussing the future of the Fells.

Ellen Shore

From: Barry Ingber [REDACTED]
Sent: Monday, November 08, 2010 1:18 PM
To: Comments, Fellstrail (DCR)
Subject: Fells Trails Plan Comment

To whom it may concern,

Please do not change Fells trail usage until after completion of a comprehensive Fells Resource Management Plan.

The perpetual lack of enforcement of regulations in the Fells - including those that forbid off-trail and off-season biking, off-leash dogs, and campfires - already causes incalculable damage to the resource and threatens users and the community. Without a firm commitment to significant enforcement, the damage and danger will only be worsened by decisions that expand use.

A Resource Management Plan would consider environmental and safety impacts of opening hiking trails to bike use, and would include plans for enforcement of all regulations to protect Fells resources and visitors.

Thank you,

Barry Ingber

Medford, MA 02155

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Subject: Proposed Fells Trail Plan

To whom it may concern:

I am concerned about the plan to open additional Middlesex Fells Reservation hiking trails to bike use and the impact it will have on the ecology of this wonderful resource. Before making any policy changes I feel a comprehensive Resource Management Plan considering environmental and safety impacts of the changes and with provisions for enforcement should be put in place. I would oppose any changes until that process is completed.

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

- 1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
- 2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
- 3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

- 2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
- 3. 6.3: Better signage, trail markings and clear maps. Yes!
- 4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
- 5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
- 6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
- 7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
- 8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

As a bike rider and hiker of long duration I can verify that bike riders do not conform their routes to the existing bike sanctioned areas. I can not say what the adverse impact of off limits riding is and can not demand a wholesale ban. there has to be a balancing of uses once acknowledged impartial experts recommend the permissible level and locations of trails other than fireroads

Until then riding should be restricted to currently approved routes

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

I support DCR's Draft Trails Plan for the Fells!

Name:

Melanie Straight

Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!
2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!
3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!
5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!
6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!
7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!
8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

3. 6.3: Better signage, trail markings and clear maps. Yes!
4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Additionally, I do not support making the Skyline Trail hiker only. It should be shared-use. Virginia Woods should not be hiker only, it will prevent completion of a loop encompassing the entire Fells as well as prevent residents who live adjacent to it from riding into the park. I do not support different days/times for segmenting use.

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:

1. 6.1: Reduce the Trail Inventory. (Increases habitat, reduces confusion) Yes!

2. 6.2: Formalize partnerships with stakeholders like NEMBA, AMC, etc. Yes!

3. 6.3: Better signage, trail markings and clear maps. Yes!

4. 6.4: Winter Closure becomes March 1-March 31 and should apply to *all* users equally. Yes!

5. 6.9: Orange (Reservoir) Trail made shared-use. Yes!

6. 6.9: Dark Hollow Pond Trail Plan implemented and then becomes shared-use. Yes!

7. 6.9: Evaluate Cross Fells (Blue) and Crystal Springs trails for shared-use. Yes!

8. 6.9: Evaluate other trails for shared-use through RMP process. Yes!

Subject: I support the Draft Trails Plan for the Fells!

I support DCR's Draft Trails Plan for the Fells!

Name:

A J Gemperline

Email:

Please log my support for the DCR's Draft Trails Plan for the Fells. Additionally, I support the immediate implementation of the Trails Plan while the remainder of the RMP for the Fells proceeds.

First, here are the major items of the plan that I believe are worth supporting as starting points of changes at the Fells:
